INTRODUCTION

Established in 1888, Bollé has earned a strong recognition in the sports community and all over the globe. This 130 years long success is the result of in-depth work based on an undiminished commitment to innovation and quality. Today, Bollé helmets & goggles are acknowledged for advanced technologies and comfort: always serving protection for athletes and improving performance. From materials to finish, no detail has been left to chance and each product has been developed to deliver comfort and quality in all circumstances. For 2019, Bollé charts its course through innovative solutions like the Phantom technology. This leading-edge optical system is the best lens solution for champions, as well as passionate snow sports enthusiasts; those who desire to always push their limits. No matter the level of skill and the discipline, Bollé has imagined a unique product, always adapted to your needs.

Bollé’s mission is to provide solutions perfectly matched to the effort and concentration, and to assist in your quest for success.

REVEAL THE INVISIBLE

PHANTOM
LIGHT ADAPTIVE LENS TECHNOLOGY

Improved vision = improved confidence. Phantom lens technology
- developed in partnership with Essilor® Sun Solution™ - redefines how you see on the snow.
Industry leading optical clarity & light-adaptive lens allow you to reveal the invisible.

HELMET: Instinct Mips
GOGGLES: Nevada Phantom

G O G G L E S

by **bolle**

WHAT IS PHANTOM ?

Phantom lens is a combination of **3 advanced technologies** that revolutionizes vision on snow. **Made with NXT®** material to deliver greater definition. **Molecular photochromic filter** adapting to any light condition.

LTS technology (Low Temperature Sensitivity) ensuring a high photochromic performance even in low temperatures.

A **4th technology** is also available on our ultimate **Phantom+ lens**: a semi-polarized film reducing distracting glare and enhancing contrast to distinguish ice from snow (available only on Phantom+).

Developed in partnership with  **ESSILOR**
SUN SOLUTION

THE BENEFITS OF PHANTOM

ENHANCED
VISION

AMPLIFIED
CONFIDENCE

REFINED
PERFORMANCE

UPGRADED
EXPERIENCE

OPTICAL CLARITY

Made with **nxt®** material to deliver greater definition
• Optimal clarity • Lightweight • High impact resistance
• Chemical resistance • UVA/UVB Protection

PHOTOCHROMIC PERFORMANCE

Phantom lens technology achieves a wide range visible light transmission, ensuring precise visual acuity in all weather conditions, including the most extreme. Our lens tint reaches **70% of its full activation within 20 seconds**.

STABILITY

Bollé has advanced the performance of photochromic technology to an entirely new level. The Phantom lens with exclusive LTS Technology (Low Temperature Sensitivity), delivers improved activation, **darkening or lightening whether the temperature is -25°C or 5°C**.

100% polarized lens//
blocking all reflections,
making the terrain hard to read.

50% polarized lens//
still blocking reflections yet accepting
enough light to see clearly what's ahead.

PHANTOM+
LIGHT ADAPTIVE LENS TECHNOLOGY

VISION ENHANCEMENT

Because it was not enough, we have added to our Phantom lens a semi-polarized film (50% polarization), becoming **Phantom+**.
When a 100% polarized lens fully blocks all reflections caused by the sun on snow, the Bollé 50% polarized film works like a moderately dense net that reduces distracting glare while getting enough light transmission through the lens in order to distinguish ice from snow. Phantom+ equipped with this technology offers an optimized reading of the terrain while reducing eye fatigue.

LENS TINTS

by **bolle**

Bolle lens technology uses 6 different lens base tints to cover the widest range of light conditions, ensuring optimal visual clarity at all times.

EQUALIZER®

COMBAT OPTICAL DISTORTION

As altitude increases, atmospheric pressure decreases, which potentially results in optical distortion. This effect is even more enhanced when you are using spherical lenses. This is the main reason why we have developed many years ago our own solution to combat optical distortion: **Equalizer®**

OUR SOLUTION

With a strategically-located breathable **insert between the inner and the outer lens**, Equalizer® regulates atmospheric pressure in our spherical lenses. The Equalizer® dot is made out of Gore-Tex in order to be breathable. With this technology on board, you'll experience optimal vision at any time. Available on all spherical adult goggles.

SPHERICAL DOUBLE LENS
WITHOUT EQUALIZER®

LOW ATMOSPHERIC PRESSURE CAN
WARP YOUR INNER LENS,
CREATING OPTICAL DISTORTION

SPHERICAL DOUBLE LENS
WITH EQUALIZER®

AIR PRESSURE STAYS UNIFORM,
DELIVERING OPTIMAL VISION

SPORT OPTICAL SYSTEM®

SNAP-IN SOLUTION FOR PRESCRIPTION USERS

The Bollé SOS prescription adapters easily snap into place to provide the corrective vision required while maintaining a wide field of view.

FOR ADULTS

No need to wear your prescription glasses anymore, our solution offers the best comfort for your eyes all day long.

50617 SOS Adult optical clip

FOR CHILDREN

Our prescription adapter is also available for children, and can be adapted in all our junior goggles, except INUK.

50174 SOS Junior optical clip (only for Royal, Rocket Plus, Rocket)

Fits perfectly
—
Maintains a wide field of view

GOGGLE TECHNOLOGIES

THE SAME LEVEL OF ATTENTION IS BROUGHT TO OUR ENTIRE RANGE OF GOGGLES. FIND BELOW ALL OF THE OTHER ADVANCED TECHNOLOGIES FEATURED ON OUR PRODUCTS.

**P-80+
ANTI-FOG**

Embedded premium Anti-fog layer in the inner lens disperses water molecules across the surface of the lens, restricting moisture build up that can impede your crystal clear view of the terrain ahead. Available on all our goggles.

**CARBO GLAS®
ANTI-SCRATCH**

A high-tech protective armor applied to the outer lens creates a shield to significantly reduce scratching, keeping your lenses and outlook as clear as a bluebird sky.

**DOUBLE
LENS**

Creation of a dual-pane thermal barrier between the cold dry outside air and the moisture generated by intense activity prevents distracting condensation from forming.

**UV
PROTECTION**

All Bollé® lenses block harmful UVA/UVB rays up to 400 nanometers.

**FLOW-TECH®
VENTING**

Engineered venting systems in each frame promote directional airflow across the inside surface of the lens, reducing the potential for moisture build up and maintaining your pristine vision.

**FORESTAY™
SYSTEM**

Outrigger systems are designed for goggles to sit snugly on your face, while allowing the strap to interact independently with the latest helmet designs for an integrated fit.

**GOGGLE / HELMET
INTEGRATION**

Bollé® helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

**SILICONISED
STRAP**

The siliconised strap helps provide total support for the goggle on the helmet.

PHANTOM LIGHT ADAPTIVE LENS TECHNOLOGY

Improved vision = improved confidence. Phantom lens technology - developed in partnership with Essilor® Sun Solution™- redefines how you see on the snow. Industry leading optical clarity & light-adaptive lens allow you to reveal the invisible.

EQUALIZER® TECHNOLOGY

Experience optimal vision with the Equalizer® technology, a specific breathable insert which regulates the atmospheric pressure in between the lenses, to avoid optical distortion.

TRIPLE DENSITY FOAM

The only material that touches your face is an ultra-soft layer of polar fleece. Two progressively denser layers of foam ensure an always secure and comfortable fit.

WIDE FIELD OF VIEW

Our spherical lenses ensure maximum peripheral vision, a requirement in the slalom gates or to read the terrain before dropping.

P-80+ ANTI-FOG

Embedded premium Anti-fog layer in the inner lens disperses water molecules across the surface of the lens, restricting moisture build up that can impede your crystal clear view of the terrain ahead.

CARBO-GLAS® ANTI-SCRATCH

A high-tech protective armor applied to the outer lens creates a shield to significantly reduce scratching, keeping your lenses and outlook as clear as a bluebird sky.

FLOW TECH® VENTING

Engineered venting systems in each frame promote directional airflow across the inside surface of the lens, reducing the potential for moisture build up and maintaining your pristine vision.

DOUBLE LENS

Creation of a dual-pane thermal barrier between the cold dry outside air and the moisture generated by intense activity prevents distracting condensation from forming.
