CEBÉ
PURE ADRENALINE

LENS BASE TINTS PERFORMANCE

MAXIMUM GLARE REDUCTION

GREY

- True colour perception
- Comfort for eyes
- Sunny-to-bright light conditions

VISUAL ACUITY

BROWN

- Enhances contrast
- Depth perception
- Improves visual acuity
- Reduces blue light
- Variable light conditions

VERSATILE LENS

ROSE

- More versatile
- Increases contrasts
- True colour balance
- Medium-to-bright conditions

OPTICAL COMFORT

ORANGE

- Reduces blue light
- Improves depth perception
- Maximum optical comfort
- Variable light conditions

MAXIMUM CONTRASTS

AMBER

- Improves contrast
- Good optical clarity
- All weather conditions

INCREASES CONTRASTS

YELLOW

- Increases contrast and reduces eye fatigue
- Ideal light transmission
- Cloudy and low-light conditions
- Indoor activities

MAXIMUM LIGHT TRANSMISSION

CLEAR

- Perfect for extremely low light, dusk and dawn

MIRROR COATING PERFORMANCE

DARKER FIELD OF VISION

FLASH GOLD

- Reflects extremely bright light
- Darker field of vision
- High contrast
- Reduces eye strain

ABSORBS REFLECTIONS

FLASH BLUE

- Absorbs reflections from snowy surfaces
- Diminishes harmful glare
- Diminishes harmful blue light
- Fine-tunes your vision

STRONG REFLECTION

FLASH DARK RED

- Improves contrast
- Darker field of vision
- Perfect in case of strong reverberation
- Good visual comfort

VERY BRIGHT CONDITIONS

FLASH FIRE

- Excellent for contrast
- Blocks red light to prevent dry-eye
- Sunny and very bright conditions

SHARPENS CONTRAST

FLASH PINK

- Sharpens contrast
- Brightens targets
- Feminine touch

SHARPER VISION

FLASH SILVER

- Trendy and discreet look
- Sharper vision
- Less glare
- Reduces eye fatigue

CÉBÉ LENS TECHNOLOGY

FOR A CRYSTAL-CLEAR VISION

ANTI-FOG COATING

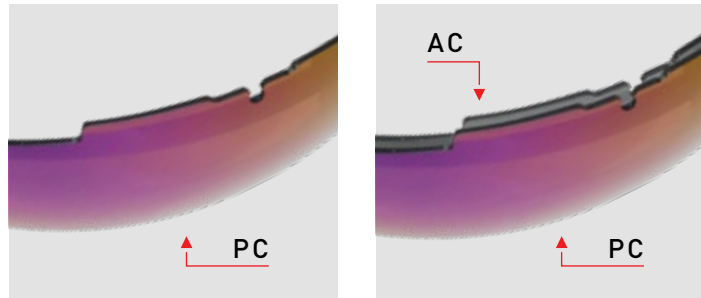

Cébé's anti-fog coating is applied to the inside of the lens, dispersing water molecules across its surface and preventing the build-up of condensation and moisture.

FOR MORE DURABILITY

ANTI-SCRATCH COATING

Our specially formulated anti-scratch hard coating applied to the outside lens increases the lens hardness thus improving scratch and abrasion resistance. Our coating also builds a better foundation for the adhesion of mirrored coatings.

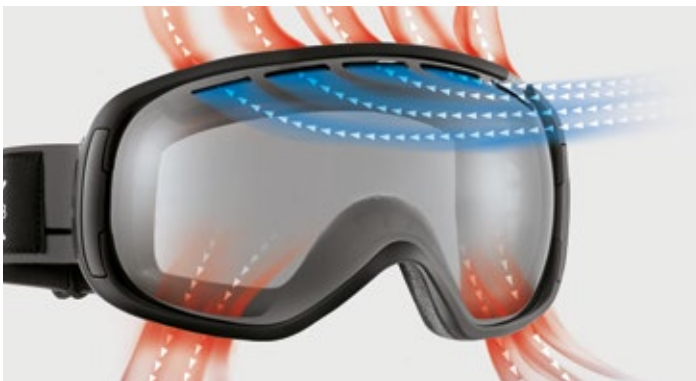

PERFECT VISIBILITY

SINGLE LENS

Made of polycarbonate, Cébé's single lenses are very impact resistant and allow good ventilation.

DOUBLE LENS

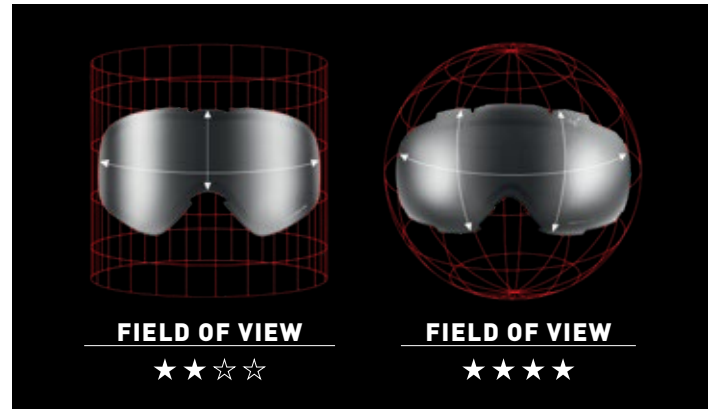

The PC and AC double lens construction from Cébé offers perfect visibility eliminating any distortion and fog.

AVOID ANY RISK OF FOGGING

VENTILATED LENS

Openings on the external lens allow an optimized air circulation between the two lenses and inside the goggle, avoiding any risk of fogging and maintaining a better thermic regulation. Foam on the upper and lower parts of the goggle allow these airflows to circulate while preventing snow and moisture from infiltrating.

IMPROVED FIELD OF VIEW

CYLINDRICAL VS SPHERICAL

Cylindrical lenses are designed on a base curvature on the X axis (horizontal), and thus follow the curve of the face offering a good field of view. On the other hand, spherical lenses are designed on both X and Y axis (horizontal and vertically) which gives a more rounded shape and a better quality of vision by reducing optical distortions and maximizing vertical and horizontal peripheral viewing angles.

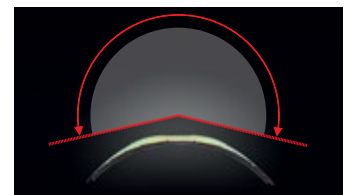

GOOD VISION WHATEVER YOUR PRESCRIPTION

SOS RX ADAPTER

The Cébé SOS RX Adapter can be easily put in place to provide the corrective vision required while maintaining the wide field of vision. It's compatible with all styles except Jerry 2.

CBOPTIGOG - Cébé SOS RX Adapter for Goggles.

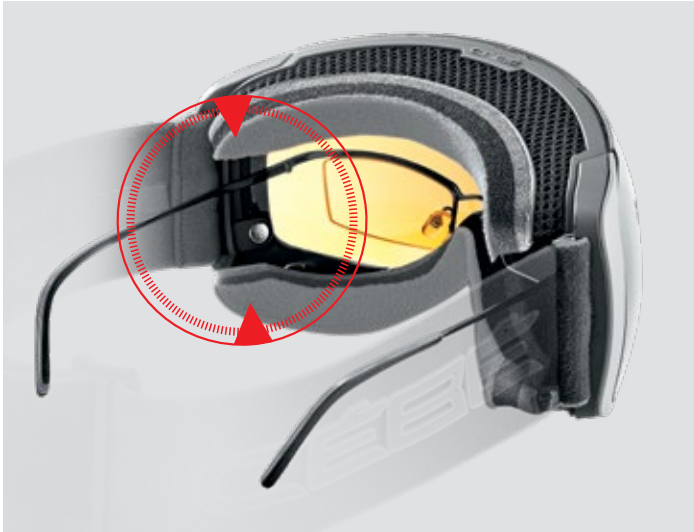

SEE EVERYTHING AROUND YOU

WIDE FIELD OF VIEW

The wide field of vision ensures maximum peripheral vision both horizontal and vertically allowing you to observe and enjoy everything around you.

CÉBÉ FRAME TECHNOLOGY

WEARING PRESCRIPTION GLASSES WILL NO LONGER BE A PROBLEM

OVER THE GLASSES

Our OTG range offers wider goggles and strategic cuts into the inner foam and frame to perfectly fit prescription glasses. Céb  also added a magnetic OTG style to the range with a thinner nose to facilitate the positioning of glasses, even with the goggle already positioned on the face.

OTG GOGGLES - page 54

BETTER HELMET INTEGRATION

ARTICULATED OUTRIGGERS

The articulated outriggers provide better helmet integration and prevent deformation of frame and lens for more comfort and optimized vision.

SOFT TOUCH FOR MAXIMUM COMFORT

3 DENSITY FOAM

Overlapping of dual density foam with a fleece coating to ensure a better retention and more comfort.

PERFECTLY MAINTAINS ON THE HELMET

SILICONE STRAP

The silicone strips inside the strap ensure better stability and good support of the goggles on the helmet.

MAGNETIC TECHNOLOGY, NOTHING SIMPLER FOR A CRYSTAL CLEAR VISION

Cébé's magnetic technology allows you to **change your lenses quickly** and have the best vision possible whatever the weather conditions.

Thanks to **8 to 9 magnets**, lenses are perfectly secured to offer you maximum security and comfort.
