

SHARE OUR PASSION!

Born in 1892 in Jura, Cébé is one of the pioneers in the sunglass industry. After extending its activity to snow helmets and goggles in 1940, Cébé continues today to passionately, technologically and trendily protect all athletes in search of Pure Adrenaline! The success of the brand is also a result of its state of mind: resolutely focusing on the future, Cébé is always looking for new horizons to conquer.

ADULTS HELMETS

Protection is at the heart of our priorities. That's the reason why Céb  develops a full range of ski helmets, always going further in terms of technology. With products featuring key technologies as MIPS® and Boa® Fit System, and after reviewing our entire fit range, we ensure the best symbiosis between innovation, protection, comfort and style. C b 's helmets will definitely be your ally in all your activities to make you more confident.

HELMET CONSTRUCTION

PERFECT COMBINATION OF LIGHTNESS AND RESISTANCE

HYBRID CONSTRUCTION

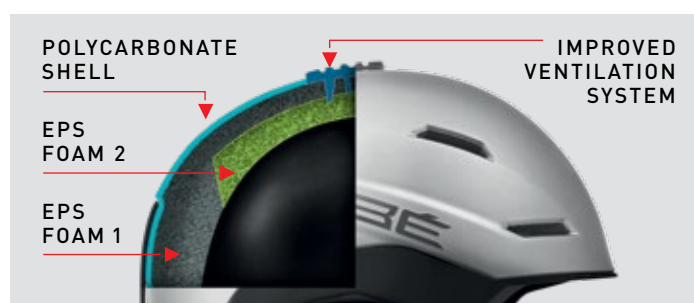

Cébé's hybrid construction represents the perfect combination of In-Mold technology and injected ABS. The ABS shell, at the top of the helmet ensures good impact resistance and protection while the In-Mold construction, on the lower part, is a guarantee of having a lightweight and comfortable product.

COMFORT AND LIGHTNESS

IN-MOLD CONSTRUCTION

Ultra-light construction made from an EPS injection and an ultra-resistant polycarbonate shell. The In-Mold construction has become the reference in terms of comfort and being lightweight.

LIGHTNESS AND INCREASED AIRFLOW

DOUBLE IN-MOLD CONSTRUCTION

The double In-Mold construction guarantees ultra-lightweight helmets thanks to the overlapping of two In-Mold structures. It also helps to offer more ventilated products as adjustable ventilation is easier to implement.

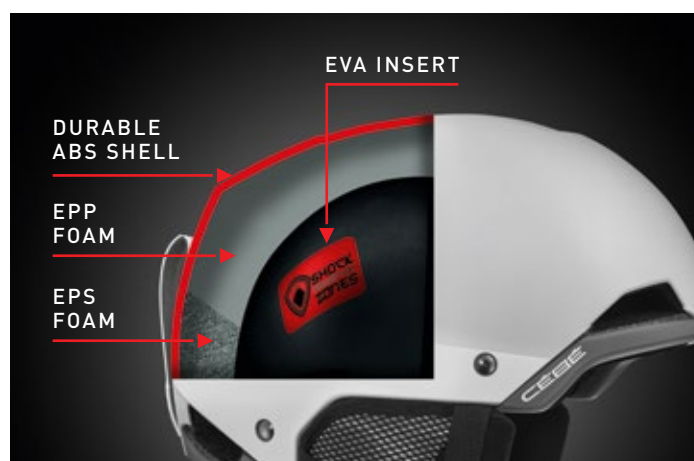

ABS CONSTRUCTION

HIGH CAPACITY OF SHOCK ABSORPTION

ABS CONSTRUCTION

The ABS construction is made from a single injection to provide maximum resistance to time and impacts. Made of ABS beads this construction prevents any risk of deformation.

A UNIQUE CONSTRUCTION FOR MAXIMUM PROTECTION

NEW CONSTRUCTION: ABS TRI-ZONE

This 3-material construction revolutionizes the concept of protection and comfort. It comprises:

- an ABS shell for maximum resistance
- rigid EPS foam for good shock absorption
- EPP foam, a more lightweight and elastic material which avoids any risk of deformation, making this helmet one of the lightest on the market.

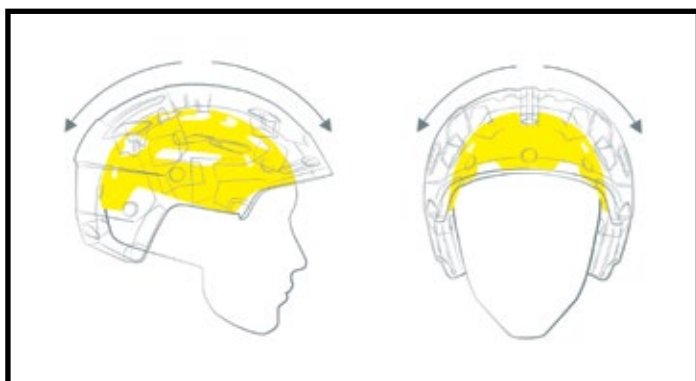

HELMET CONSTRUCTION AND SAFETY

KEEP YOUR BRAIN SAFE!

MIPS® TECHNOLOGY

MIPS® is a Brain Protection System. As rotational motion can cause brain injuries, MIPS®' low friction layer allows the head to move 10 to 15mm, in all directions, inside the helmet, thus reducing the rotational motion of the brain upon impact. Cébé's MIPS® helmet technology protects your skull and your brain!

SHOCK ABSORPTION ZONES

EVA FOAM

Placed at strategic points in the helmet (front, temples and rear), EVA inserts deliver maximum shock absorption to reduce strain to the brain upon impact.

BE SEARCHABLE, BE SAFE

RECCO®

The RECCO® Rescue Reflector, incorporated in our helmets, helps professional rescuers locate you in the event of an avalanche accident or if you are lost outdoors. The detector used by rescuers emits a directional signal and the RECCO® reflector worn by the user bounces the signal back to show them the way.

RECCO® TECHNOLOGY IS NOT A SUBSTITUTE FOR AN AVALANCHE TRANSCEIVER.

HELMET TECHNOLOGY

FIT

REVIEWED FIT, MORE PRECISE AND ADJUSTABLE

CÉBÉ UNIVERSAL FIT

Cébé Universal Fit (CUF) has been created to deliver a more consistent range in terms of fit. The width of each size range is now reduced, so Cébé offers adjustable helmets to guarantee maximum stability, comfort and safety. You'll be certain to find the perfect helmet for you!

GET BETTER PROTECTION AND ALL-DAY COMFORT

BOA® FIT SYSTEM

Cébé also offers helmets that feature the most advanced technology in terms of fine tuning the fit.

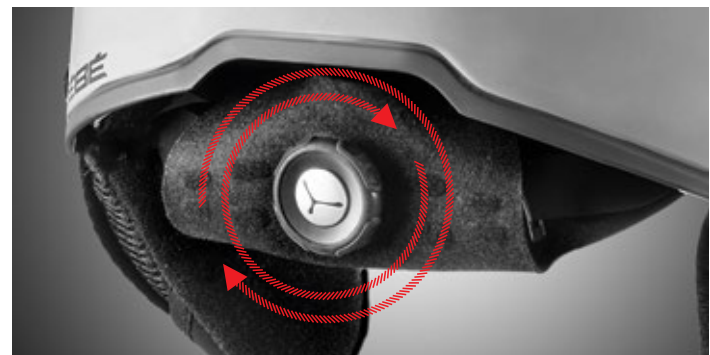

The Boa® Fit System, seamlessly incorporated into our helmets, provides a customized fit thanks to its 360°-wheel system which allows micro-adjustments, be they vertical, frontal or horizontal. Your helmet sits snugly on your head with no pressure points, and getting it on and off is quick and easy.

FIT VERSATILITY

FINE TUNING FIT SYSTEM

The F.T.F. (Fine Tuning Fit) provides added versatility to the helmet. The fine adjustment allows a tighter fit for perfect stability during even the most extreme activities. When not skiing, a simple readjustment will release the system for a more relaxing fit.

HELMET TECHNOLOGY

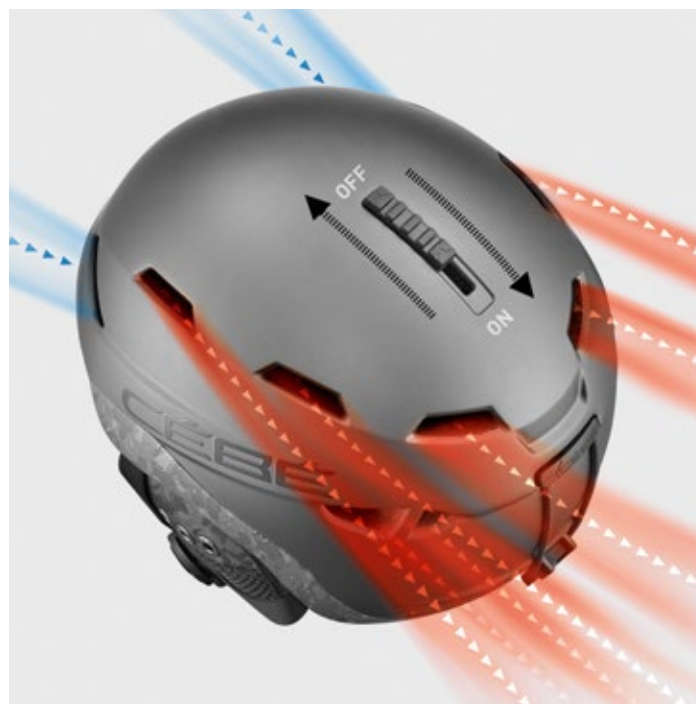

VENTILATION SYSTEMS

KEEP YOUR HEAD COOL

PASSIVE VENTING SYSTEM

Cébé's passive venting system is composed of openings placed at strategic points to ensure a constant air flow, evacuating heat and avoiding cold air from entering.

CONTROL THE AIRFLOW

ADJUSTABLE VENTING SYSTEM

Adjustable, easy to use and extremely efficient, our ventilation system allows you to change the amount of air flow and expel heat even with gloves.

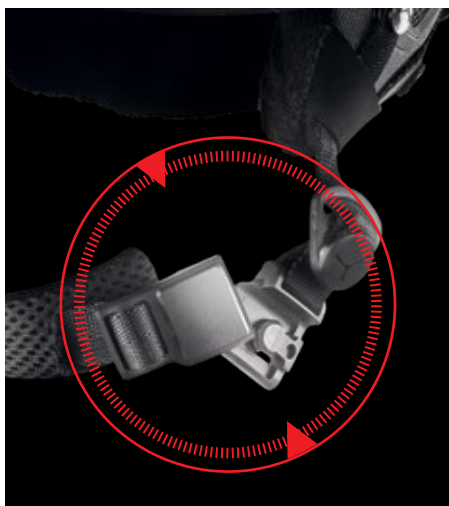

COMFORT AND HYGIENE

DETACHABLE AND WASHABLE LINING

In the interests of comfort and hygiene, most of our helmets have removable and washable inner padding. For increased breathability, most linings have 3D mesh panels that allow heat to escape more easily.

OTHER TECHNOLOGIES

QUICK RELEASE YOUR MAGNETIC BUCKLE

FIDLOCK SYSTEM

Fidlock is revolutionising the traditional helmet buckle. With the Fidlock snap, you can close and open automatically your fast buckle thanks to a magnetic system.

A FREESTYLER LOOK

REMOVABLE EAR PADS

Removable and washable earpads.
