INTRODUCTION

Bollé is committed to improving performance through innovation. Our past support for some of cycling’s most important athletes and teams, including Miguel Indurain, Alex Zülle, Banesto and Once, as well as our current affiliation with AG2R LA MONDIALE make a strong statement about our profound, long-term connection with the sport. Our involvement at the highest levels of cycling is the catalyst driving a never-ending pursuit of product improvements that help riders go faster, be safer and have more fun. The success of our recently-launched cycling helmets is down to four decades’ experience of building products for the sport, as well as the expertise gathered bringing our popular line of snow-sport helmets to market.

BOLLÉ RESEARCH & DEVELOPMENT

HIGH PERFORMANCE CYCLING

Bollé is proud to introduce our newest new road cycling helmet: FURO MIPS. FURO MIPS has been designed and developed to meet even the toughest rider's expectations. Attention to detail, optimized internal channeling, and best-in-class head protection solutions result in a unique cycling helmet with great ventilation and style.

OPTI-DOCK

Given Bollé's history of designing and developing eyewear it felt only right to have a dedicated place to stow eyewear in our helmets. Bollé's Opti-Dock storage system provides dedicated place to securely stow your eyewear.

OPTIMIZED VENTILATION

Bollé's new FURO and EXO helmets have been designed and developed for optimal ventilation. Deep channeling combined with large intake and exhaust ports optimize airflow and enhance ventilation.

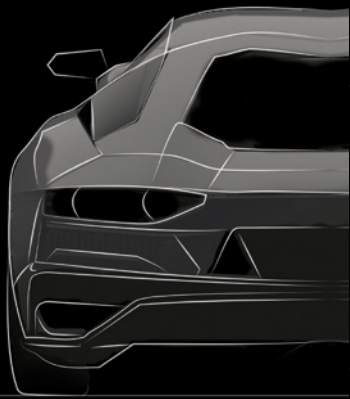

HIGH TECH SAFETY

Equipped with MIPS technology, FURO, EXO & TRACKDOWN are the most advanced helmets we have developed yet. Allowing more protection to the brain on angled impacts, MIPS technology is today recognized for its safety features in the cycling world.

AUTOMOTIVE INSPIRED DESIGN

Speed, aerodynamism, safety, performance: all criteria taken into account by automakers to develop their best cars. And we thought: 'Why not us'?

Our new road cycling helmets have been designed and developed according to these positions. Using the car industry as our inspiration, we have adapted car components to our helmets.

The result is the best combination of style and performance, for your daily rides.

BOLLÉ DESIGN & ENGINEERING LAB

Bollé's inhouse industrial design and engineering team develop helmets and eyewear using a variety of tools. Sculpting forms by hand and on the computer allows Bollé to prototype helmets and eyewear inhouse using state-of-the art 3D printers. Impact testing helps us to improve our development and produce safe helmets.

MIPS TECHNOLOGY

MULTI-DIRECTIONAL IMPACT
PROTECTION SYSTEM

MIPS ADDS MORE
PROTECTION AGAINST
ROTATIONAL MOTION

MIPS is a revolutionary technology that lets the helmet slide relative to the head, adding more protection against rotational motion to the brain caused by angled impacts. Because keeping you safe in every condition is our priority, FURO, EXO, & TRACKDOWN models feature the MIPS technology.

LOW STRAIN LEVEL HIGH

= THE MORE RED THE MORE STRAIN

This simulation illustrates strain in the brain from a similar angled impact when the user is wearing a helmet without MIPS and a helmet with MIPS.

AVAILABLE WITH MIPS

FURO MIPS p.16

EXO MIPS p.17

TRACKDOWN MIPS p.25

AVID PROGRESSIVE EPS TECHNOLOGY

MAXIMUM VENTILATION
WITH HIGH PROTECTION

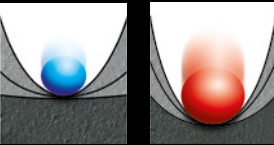

To create helmets that perform against all types of impacts, the details are key. High-density EPS ensures that high energy impacts are effectively absorbed.

Low-density EPS, however, provides superior performance against less severe impacts. Bollé helmets with AVID liner technology use a combination of different EPS densities and/or optimization of the ventilation channels to virtually decrease the density in the upper area. The result is a lighter, better-ventilated helmet with progressive shock absorption that will absorb a wider range of impacts*.

(Available on the Trackdown model.)

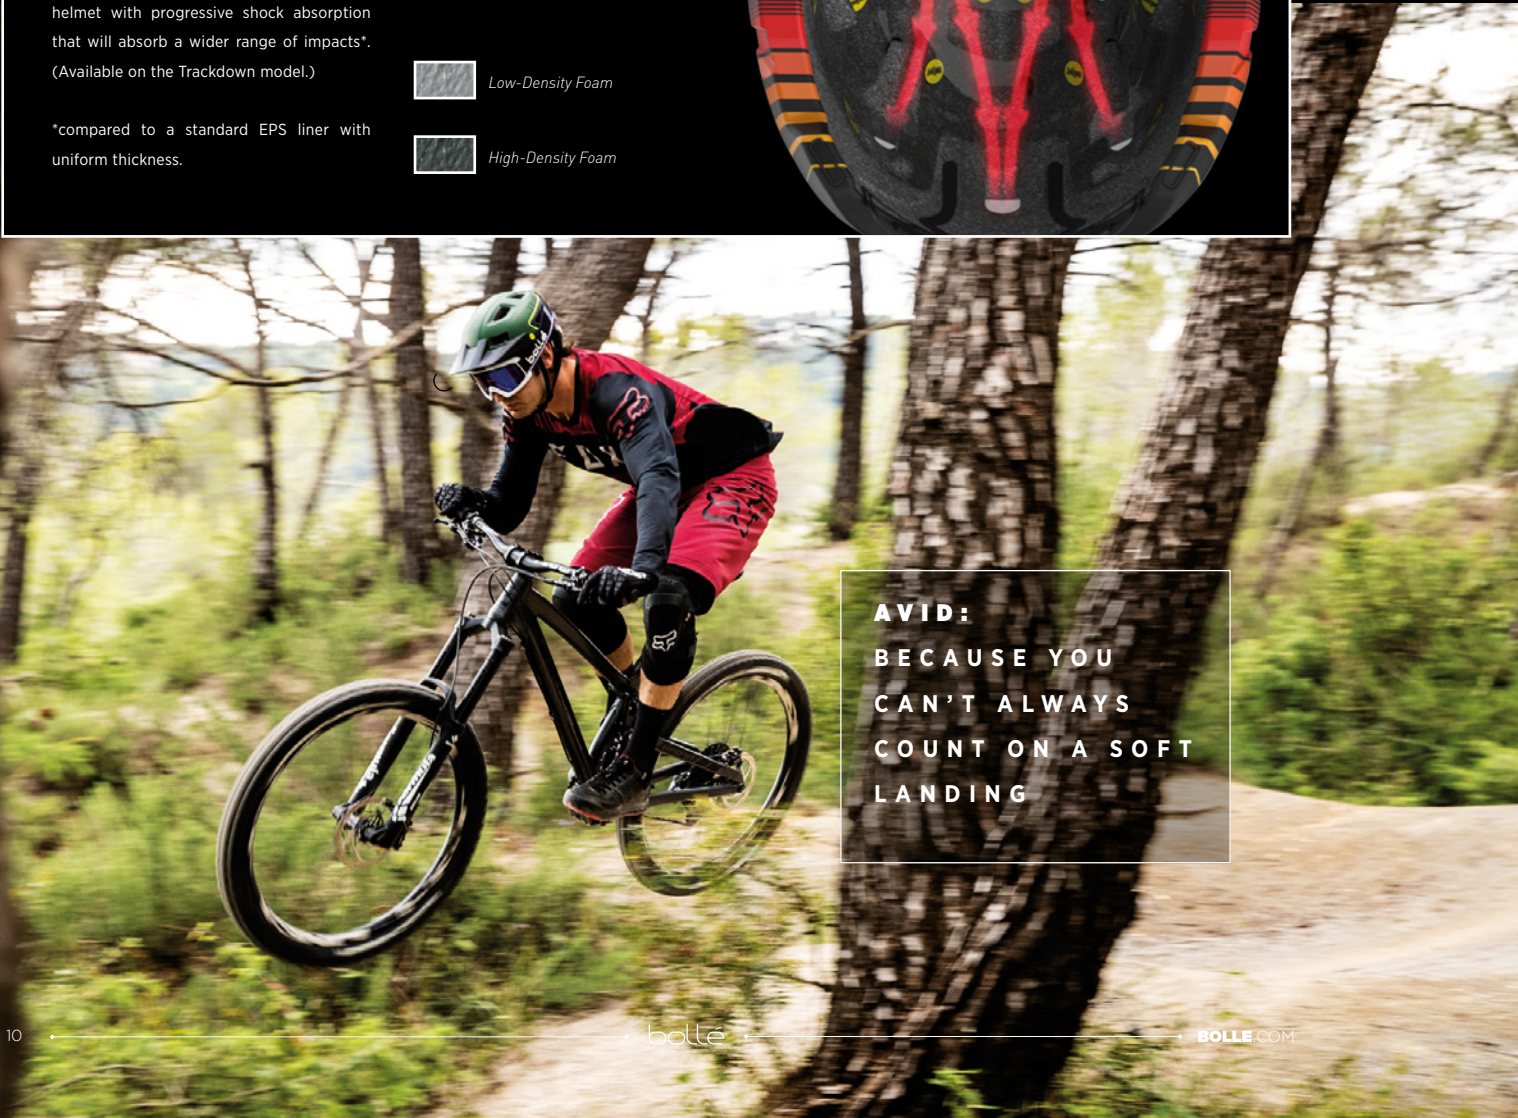

*compared to a standard EPS liner with uniform thickness.

A MIX OF ACTUAL AND VIRTUALLY DIFFERENT DENSITIES EFFECTIVELY MANAGES DIFFERENT KINDS OF IMPACTS

Low-Density Foam

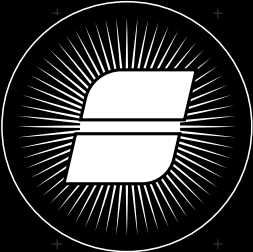

High-Density Foam

AVID:
BECAUSE YOU
CAN'T ALWAYS
COUNT ON A SOFT
LANDING

HI-VIS TECHNOLOGY

SAFETY BY NIGHT
AVAILABLE ON MESSENGER
PREMIUM

REFLECTIVE
ELEMENTS
FOR NIGHT
RIDES

The risk of being hit by a car is doubled in the dark. Wearing reflective materials halves that risk. The Hi-Vis technology available on MESSENGER PREMIUM features reflective materials that improve your safety in traffic, especially when the visibility is poor.

R O A D
H E L M E T S

NACA DUCT

Originally developed for aerospace, this submerged inlet provides less drag for better aerodynamics. It increases airflow inside the helmet, bringing a higher level of ventilation.

AERODYNAMICS

OPTI-DOCK

With Bollé's history of designing and developing eyewear it felt only right to have a dedicated place to stow your eyewear in the FURO. Bollé's Opti-Dock storage system is a dedicated place to securely stow your eyewear.

COMFORT

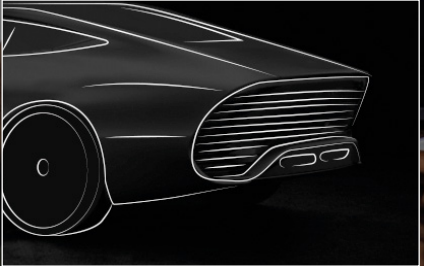

FAST... AND FURO

FURO MIPS is Bollé's pinnacle performance road cycling helmet. Design work on aerodynamics and ventilation and airflow testing, all inspired by the automotive industry, laid the foundation for FURO MIPS. Also paired with innovative solutions on the comfort side, this helmet is packed with features designed to enhance your performance on the road.

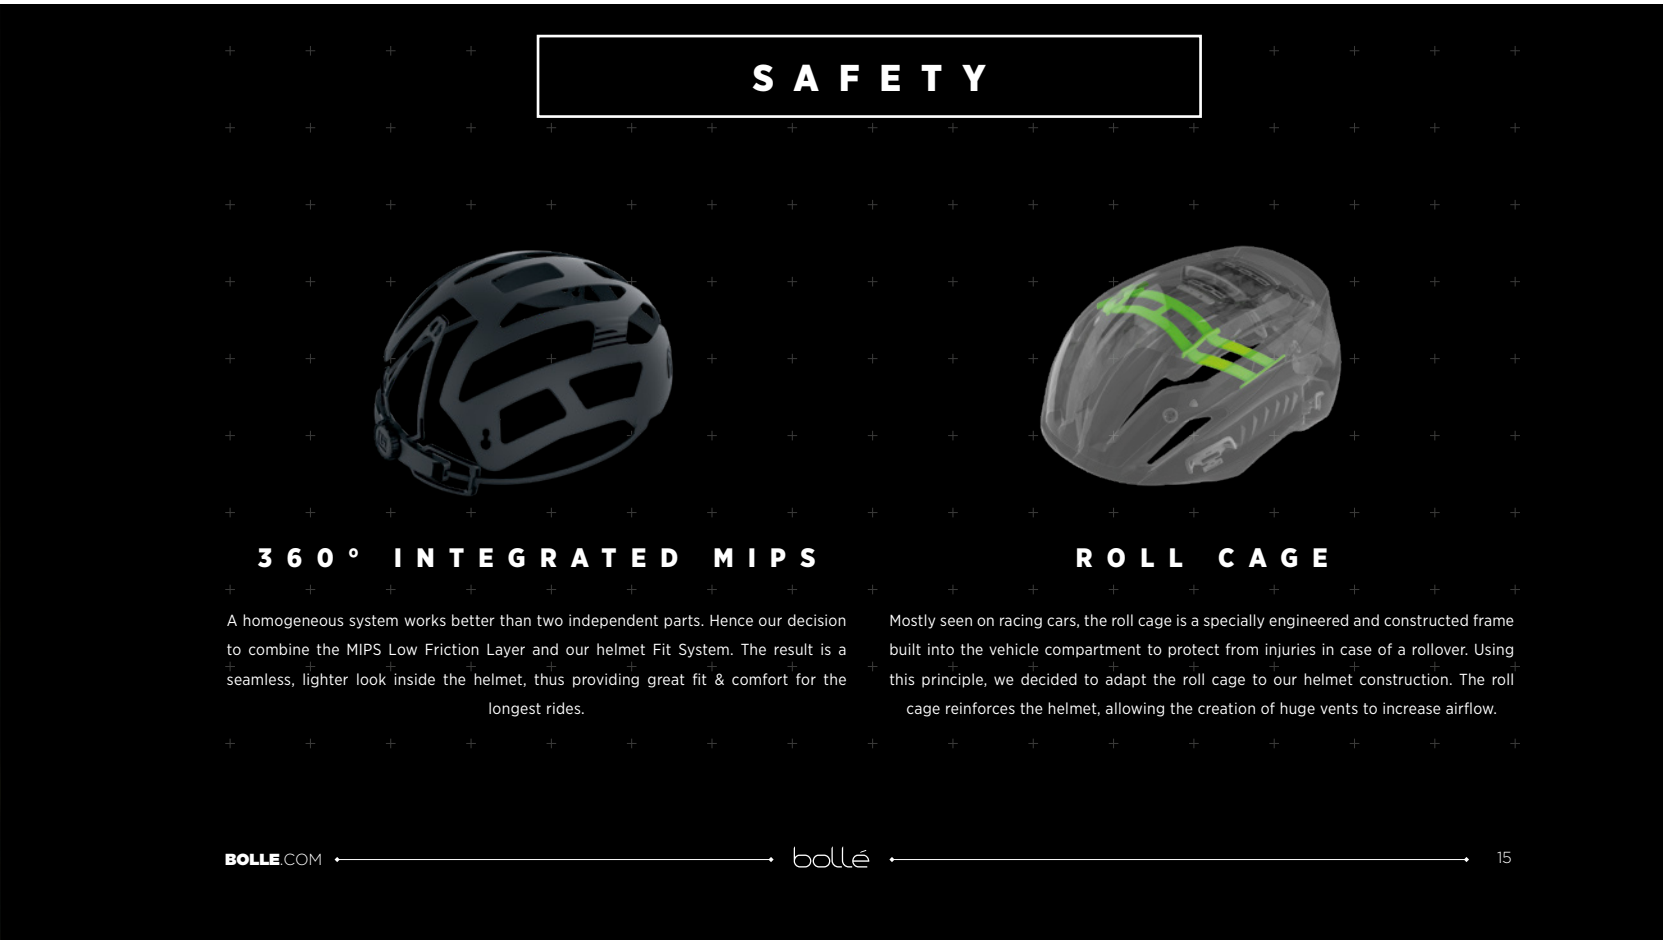

KAMM TAIL

The abrupt rear cut-off delivers a smaller wake that reduces drag and so improves aerodynamics.

WIND SHELLS

The wind shells make your helmet more aerodynamic, while bringing extra protection during bad weather.

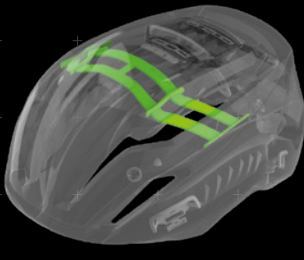

SAFETY

360° INTEGRATED MIPS

A homogeneous system works better than two independent parts. Hence our decision to combine the MIPS Low Friction Layer and our helmet Fit System. The result is a seamless, lighter look inside the helmet, thus providing great fit & comfort for the longest rides.

ROLL CAGE

Mostly seen on racing cars, the roll cage is a specially engineered and constructed frame built into the vehicle compartment to protect from injuries in case of a rollover. Using this principle, we decided to adapt the roll cage to our helmet construction. The roll cage reinforces the helmet, allowing the creation of huge vents to increase airflow.

FURO MIPS

SIZES : FROM 52-55 CM TO 59-62 CM

Make the wind your ally with FURO. With its sportscar-inspired design, FURO has all it takes to perform on the road: aerodynamic profile, light-weight and great cooling. Key features include the Opti-Dock and a 360° integrated MIPS fit system for maximum comfort over the longest distances. The MIPS protection system redirects energy to provide more protection against angled impacts.

AVAILABLE TECHNOLOGIES

- Opti-Dock
- NACA duct
- Kamm tail
- Roll cage
- 360° Integrated Mips
- Removable wind shells

GREAT PROTECTION

Deep coverage to protect you in all conditions, whether you are climbing up or riding down the hill.

VENT CAPS

Plug them in and stay dry! The vent caps efficiently block off wind and rain for the wettest outings.

THE BEST IN MTB SAFETY

TRACKDOWN is an all-mountain helmet designed to perform on any trail.

This helmet features a deep coverage at the rear, the Bollé Eyewear Storage to store your sunglasses, Vent caps to protect from bad weather conditions, and a 3-position visor allowing space for goggles. If you're looking for style and comfort on the tracks, the TRACKDOWN is the ultimate gear to wear.

ADJUSTABLE VISOR

With 3 positions, the adjustable visor adapts to all ride conditions, and means your goggles can sit on your forehead.

OPTI-DOCK

TRACKDOWN is equipped with the specific Opti-Dock storage system designed to hold a pair of sunglasses, ideal when you need to give your eyes a rest.

TRACKDOWN MIPS

SIZES : FROM 52-55 CM TO 59-62 CM

This mountain bike helmet from Bollé offers a unique set of features. A 360° retention system for stability and full adjustability. AVID progressive EPS to combine channels for superior ventilation with progressive shock absorption. The Opti-Dock system to hold your sunglasses, a 3-position visor allowing space for goggles, and vent caps for bad weather conditions. Available with MIPS.

WHAT IS PHANTOM ?

The Phantom lens is a combination of 3 advanced technologies that revolutionize how you see your environment. Made with NXT® material for enhanced definition and a molecular photochromic filter that adapts to all light conditions. Also, a high-contrast filter improves color and depth perception.

OPTICAL CLARITY

Made with NXT material, Phantom lenses raise the optical clarity of our lenses to a new level. Thanks to Essilor® Sun Solution™, we've been able to raise the optical clarity of our lenses to a new level. NXT material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

PHOTOCHROMIC PERFORMANCE

Phantom lens technology adapts to any light condition, ensuring precise visual acuity whatever the weather. The lens tint changes with the light from cat.1 to cat.3. **Enhanced vision whatever the conditions.**

HIGH CONTRAST

Bollé has advanced the performance of Phantom lens technology by adding a high contrast filter on its lenses. Available on all Phantom lenses, the high contrast filter boosts colors and significantly enhance your vision. Whether you are on the road or on trails, high contrast lenses will help you to perceive the obstacles.

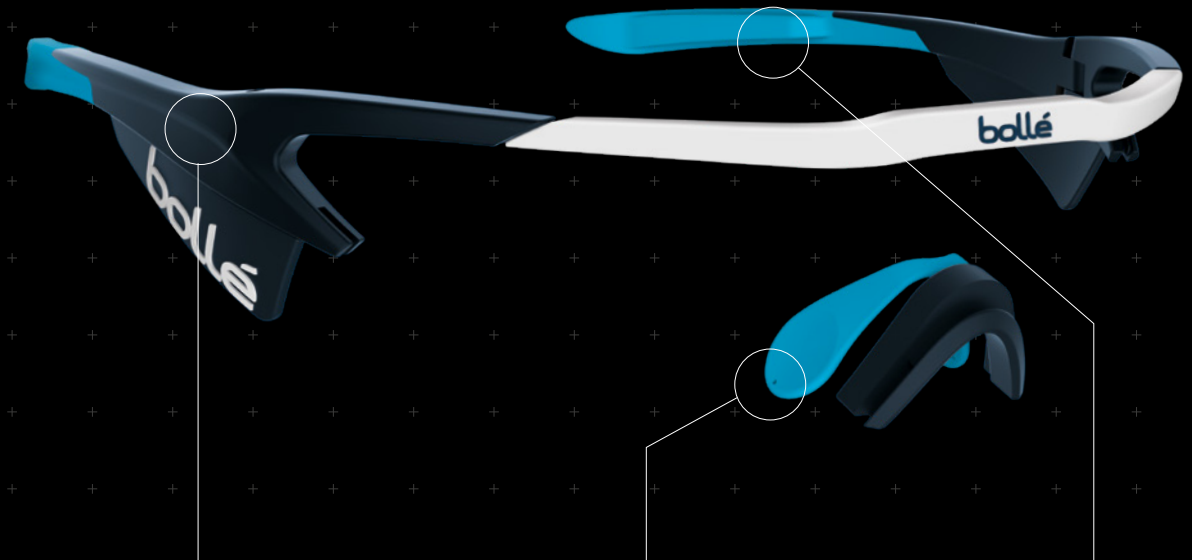

THE COMFORT EQUATION

(ADJUSTABILITY + FIT + GRIP)

PERFECT COMFORT

LIGHTWEIGHT

NYLON FRAME

Bollé® uses only the finest grade nylon, resulting in frames that are exceedingly strong, yet lightweight and flexible. No matter how tough the competition, these sunglasses can take it.

ADJUSTABLE NOSEPIECE WITH THERMOGRIP®

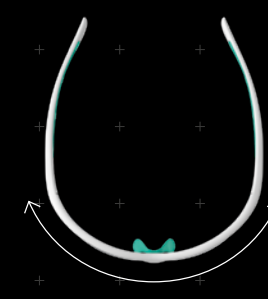

The shape and angle of the multi-plane nosepiece can be adjusted to accommodate any nose bridge for a truly custom fit.

NOSE PADS: The hypoallergenic and durable nose pads can be tailored for a custom fit, giving you additional control and comfort.

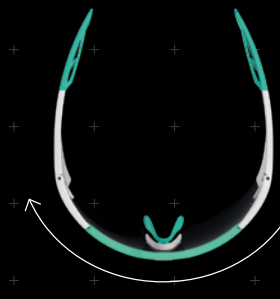

ADJUSTABLE TEMPLES WITH THERMOGRIP®

The temples can be adjusted which offers a truly tailored fit and the ultimate in comfort.

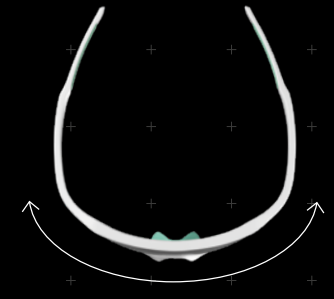

The temple tips, nose pads and adjustable nosepiece are all made from our proprietary Thermogrip®. This hydrophilic material has moisture-absorbing properties that keep the frames comfortably in place, even during extreme exertion.

THE ULTIMATE FIT

With S-curved temples, SHIFTER delivers best-in-class retention and perfect helmet integration. Thermogrip® on end-tips & nose pad provide additional grip on the head, for an ultimate fit.

VENTED LENS

The combination of a 6 base shield for a flat design and 3 strategically-positioned vent holes offers perfect breathability on the SHIFTER. You'll never have to worry about fog again!

TIME TO SHIFT UP A GEAR!

With an expertise of 130 years in the optics industry, Bollé brings back some history in the retro-futurist design of the SHIFTER.

Based on the famous Chrono Shield model, worn by the best cyclists in the world at that time, the SHIFTER is packed with simple yet progressive features to enjoy the ride. Curved temples, vented lens, Phantom lenses, make SHIFTER the natural choice of team AG2R LA MONDIALE.
