

CYCLING 2020

FOR SPORT, FOR LIFE.

FOR SPORT, FOR LIFE.

#FORSPORTFORLIFE

1888.

In France's Jura region, a small company was taking its first steps towards establishing what would become a leading brand in outdoor and winter sports gear. From combs to eyewear, and then pioneering in the ski goggle business, Bollé continues to equip the most accomplished athletes who have come to rely on the style and performance of the brand's products. Bollé's know-how covers a wide variety of sports (alpine skiing, cycling, golf, sailing...) and the brand's expertise has marked the industry's history with several revolutionary patents. As a key benchmark in the eyewear industry for the quality and the performance of its products, Bollé's skill was first and foremost to

master the design not only for sunglasses, but for iconic eyewear.

From the ground up, Séraphin Bollé and then Georges Bollé created unforgettable lifestyle sunglass designs such as the famous cat-eye nylon model, a must-have accessory for top celebrities of the period. 130 years of craftsmanship and trendsetting have given Bollé its enviable position today. The brand's inspiration and history shine through today's summer and winter collections, along with a tenacity that has helped it rise step-by-step with unerring commitment to innovation, creativity and quality.

HELMETS

BOLLÉ RESEARCH & DEVELOPMENT

HIGH PERFORMANCE CYCLING

Furo MIPS has been designed and developed to meet even the toughest rider's expectations. Attention to detail, optimized internal channeling, and best-in-class head protection solutions result in a unique cycling helmet with great ventilation and style.

OPTI-DOCK

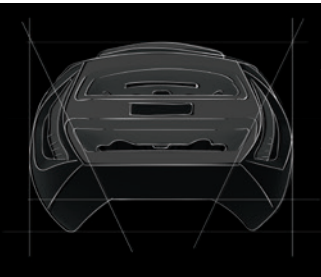

Given Bollé's history of designing and developing eyewear it felt only right to have a dedicated place to stow eyewear in our helmets. Bollé's Opti-Dock storage system provides dedicated place to securely stow your eyewear.

OPTIMIZED VENTILATION

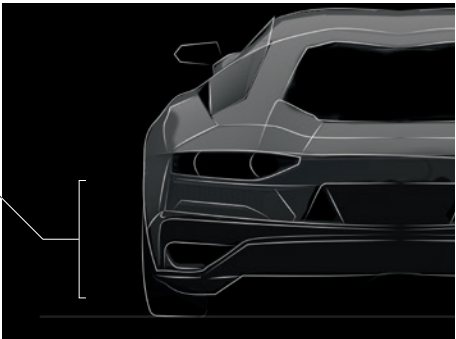

Bollé's new Furo and Exo helmets have been designed and developed for optimal ventilation. Deep channeling combined with large intake and exhaust ports optimize airflow and enhance ventilation.

HIGH TECH SAFETY

Equipped with MIPS technology, FURO, EXO & TRACKDOWN are the most advanced helmets we have developed yet. Allowing more protection to the brain on angled impacts, MIPS technology is today recognized for its safety features in the cycling world.

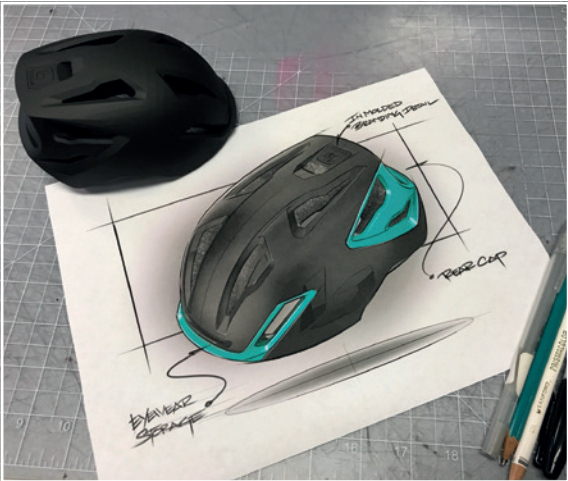

AUTOMOTIVE INSPIRED DESIGN

Speed, aerodynamism, safety, performance: all criteria taken into account by automakers to develop their best cars. And we thought: 'Why not us'?

Our new road cycling helmets have been designed and developed according to these positions. Using the car industry as our inspiration, we have adapted car components to our helmets.

The result is the best combination of style and performance, for your daily rides.

BOLLÉ DESIGN & ENGINEERING LAB

Bollé's inhouse industrial design and engineering team develop helmets and eyewear using a variety of tools. Sculpting forms by hand and on the computer allows Bollé to prototype helmets and eyewear inhouse using state-of-the art 3D printers. Impact testing helps us to improve our development and produce safe helmets.

MIPS TECHNOLOGY

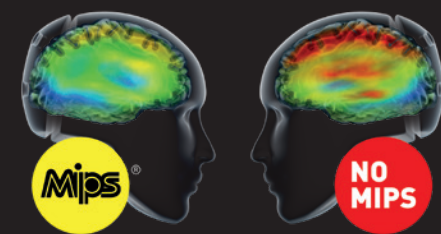

MULTI-DIRECTIONAL IMPACT

PROTECTION SYSTEM

**MIPS ADDS MORE
PROTECTION AGAINST
ROTATIONAL MOTION**

MIPS is a revolutionary technology that lets the helmet slide relative to the head, adding more protection against rotational motion to the brain caused by angled impacts. Because keeping you safe in every condition is our priority, FURO, EXO, & TRACKDOWN models feature the MIPS technology.

LOW STRAIN LEVEL HIGH

■ = THE MORE RED THE MORE STRAIN

This simulation illustrates strain in the brain from a similar angled impact when the user is wearing a helmet without MIPS and a helmet with MIPS.

AVAILABLE WITH MIPS

FURO MIPS p.16

EXO MIPS p.17

TRACKDOWN MIPS p.25

HI-VIS TECHNOLOGY

SAFETY BY NIGHT

AVAILABLE ON MESSENGER PREMIUM

REFLECTIVE
ELEMENTS
FOR NIGHT
RIDES

The risk of being hit by a car is doubled in the dark. Wearing reflective materials halves that risk. The Hi-Vis technology available on Messenger Premium features reflective materials that improve your safety in traffic, especially when the visibility is poor.

AVID PROGRESSIVE EPS TECHNOLOGY

MAXIMUM VENTILATION

WITH HIGH PROTECTION

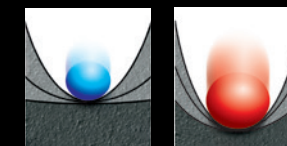

To create helmets that perform against all types of impacts, the details are key. High-density EPS ensures that high energy impacts are effectively absorbed.

Low-density EPS, however, provides superior performance against less severe impacts. Bolle helmets with AVID liner technology use a combination of different EPS densities and/or optimization of the ventilation channels to virtually decrease the density in the upper area. The result is a lighter, better-ventilated helmet with progressive shock absorption that will absorb a wider range of impacts*. (Available on the Trackdown model.)

*compared to a standard EPS liner with uniform thickness.

A MIX OF ACTUAL AND VIRTUALLY DIFFERENT DENSITIES EFFECTIVELY MANAGES DIFFERENT KINDS OF IMPACTS

OUR VEINS

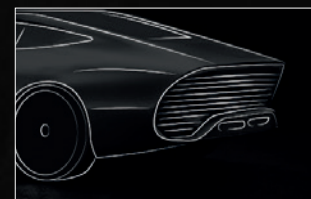

FAST ...

Furo Mips is Bollé's pinnacle performance road cycling helmet. Design work on aerodynamics and ventilation and airflow testing, all inspired by the automotive industry, laid the foundation for Furo Mips. Also paired with innovative solutions on the comfort side, this helmet is packed with features designed to enhance your performance on the road.

bollé

NACA DUCT

Originally developed for aerospace, this submerged inlet provides less drag for better aerodynamics. It increases airflow inside the helmet, bringing a higher level of ventilation.

KAMM TAIL

The abrupt rear cut-off delivers a smaller wake that reduces drag and so improves aerodynamics.

WIND SHELLS

The wind shells make your helmet more aerodynamic, while bringing extra protection during bad weather.

... AND FURO!

OPTI-DOCK

With Bollé's history of designing and developing eyewear it felt only right to have a dedicated place to stow your eyewear in the FURO. Bollé's Opti-Dock storage system is a dedicated place to securely stow your eyewear.

360° INTEGRATED MIPS

A homogeneous system works better than two independent parts. Hence our decision to combine the Mips Low Friction Layer and our helmet Fit System. The result is a seamless, lighter look inside the helmet, thus providing great fit & comfort for the longest rides.

ROLL CAGE

Mostly seen on racing cars, the roll cage is a specially engineered and constructed frame built into the vehicle compartment to protect from injuries in case of a rollover. Using this principle, we decided to adapt the roll cage to our helmet construction. The roll cage reinforces the helmet, allowing the creation of huge vents to increase airflow.

FURO MIPS

SIZES : FROM 52-55 CM TO 59-62 CM

AVAILABLE TECHNOLOGIES

- Opti-Dock
- NACA duct
- Kamm tail
- Roll cage
- 360° Integrated MIPS
- Removable wind shells

Make the wind your ally with FURO. With its sportscar-inspired design, FURO has all it takes to perform on the road: aerodynamic profile, light-weight and great cooling. Key features include the Opti-Dock and a 360° integrated MIPS fit system for maximum comfort over the longest distances. The MIPS protection system redirects energy to provide more protection against angled impacts.

GAME

THE BEST IN MTB SAFETY

TRACKDOWN is an all-mountain helmet designed to perform on any trail.

This helmet features a deep coverage at the rear, the Bollé Eyewear Storage to store your sunglasses, Vent caps to protect from bad weather conditions, and a 3-position visor allowing space for goggles. If you're looking for style and comfort on the tracks, the Trackdown is the ultimate gear to wear.

GREAT PROTECTION

Deep coverage to protect you in all conditions, whether you are climbing up or riding down the hill.

VENT CAPS

Plug them in and stay dry! The vent caps efficiently block off wind and rain for the wettest outings.

OPTI-DOCK

TRACKDOWN is equipped with the specific Opti-Dock storage system designed to hold a pair of sunglasses, ideal when you need to give your eyes a rest.

ADJUSTABLE VISOR

With 3 positions, the adjustable visor adapts to all ride conditions, and means your goggles can sit on your forehead.

SUNGLASSES

FOR SPORT, FOR LIFE

IT'S PROOF OF

OUR TENACITY,

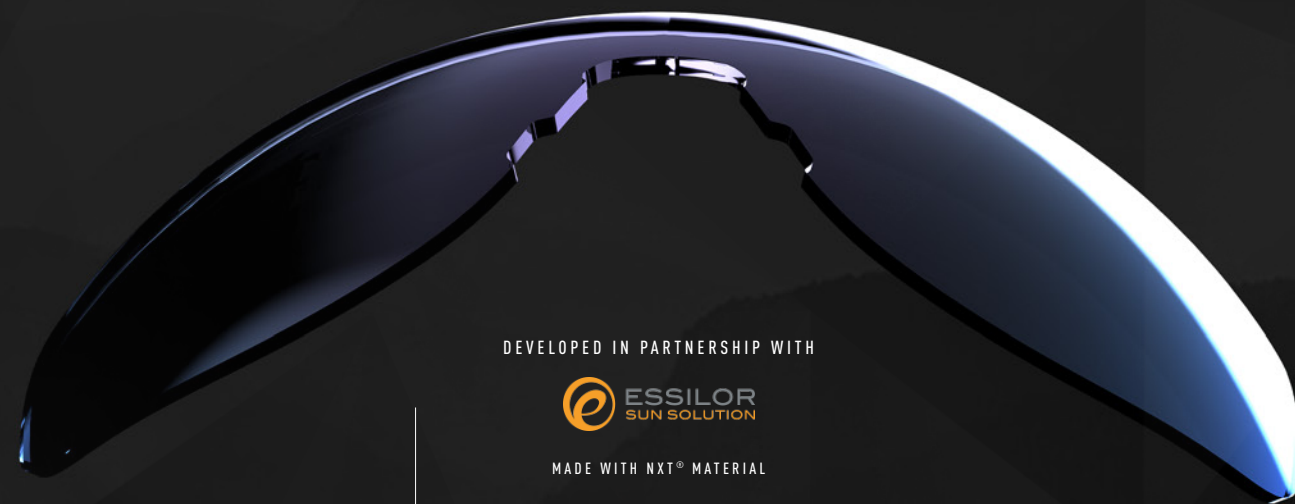

COMMITMENT,

AND PANACHE

WHAT IS PHANTOM ?

The Phantom lens is a combination of 3 advanced technologies that revolutionize how you see your environment. Made with NXT® material for enhanced definition and a molecular photochromic filter that adapts to all light conditions. Also, a high-contrast filter improves color and depth perception.

DEVELOPED IN PARTNERSHIP WITH

MADE WITH NXT® MATERIAL

OPTICAL CLARITY

Whether you are on a bike, a slope or out in the country, perfect vision is crucial if you are to perform at your very best. With optical clarity close to that of a mineral lens, our NXT® lenses considerably improve your vision acuity, thus improving hand-eye coordination and intricate motorskills.

This enables athletes at every level to employ the technology required to beat the competition.

HIGH IMPACT RESISTANCE

NXT® lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT® is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

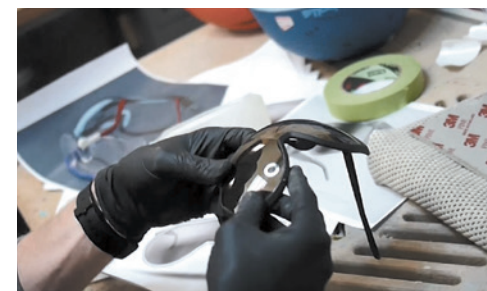

LIGHTWEIGHT

NXT® material is close to the lightest lens material available today, at 14% lighter than polycarbonate. This allows for larger designs with fuller coverage, ultimate protection and utmost comfort.

AVAILABLE IN PRESCRIPTION

Because everyone's vision is unique, our NXT® lenses are available with our B-Thin Technology, suitable for 99% of prescriptions.

FRAME TECHNOLOGY

Wearing Bollé's ultimate lenses is key to enhance your vision of the world, yet it is not enough. At Bollé we give extra attention to details and technology while creating our frames, in order to ensure you get the most comfortable and reliable eyewear for your active life.

(ADJUSTABILITY + FIT + GRIP)

LIGHTWEIGHT

=

PERFECT
COMFORT

ADJUSTABLE TEMPLES

The temples can be adjusted which offers a truly tailored fit and the ultimate in comfort.

NYLON FRAMES

Bollé® uses only the finest grade nylon, resulting in frames that are exceedingly strong, yet lightweight and flexible. No matter how tough the competition, these sunglasses can take it.

REMOVABLE SIDE SHIELDS

Whether magnetic or mechanical, the removable side shields available on Graphite & Cobalt models offer extra side protection from sunlight in extreme conditions.

ADJUSTABLE NOSEPIECE

The shape and angle of the multi-plane nosepiece can be adjusted to accommodate any nose bridge for a truly custom fit.

NOSE PADS: The hypoallergenic and durable nose pads can be tailored for a custom fit, giving you additional control and comfort.

INTERCHAN- GEABLE LENSES

Bollé® helps you stay on top of your game with this interchangeable lens system. By giving you the flexibility to match the lens to the condition, this system ensures optimum performance for any condition.

CAT.3

SLATE

FIT: MEDIUM • 8BASE 58/45/19/130

AVAILABLE TECHNOLOGIES

- Polycarbonate Lenses
- Anti-Reflective Treatment
- HD Polarized Lenses
- Thermogrip®
- Oleo/Hydrophobic Treatment

With a keyhole nose design and angled lenses, Slate has a strong lifestyle character but don't let it fool you - Thermogrip rubber inserts on the nose pads and temple tips keep the fit right, plus 8-base wrap for better coverage, and great optics make the Slate your best friend whether in action or just hanging out.

ROOKE

FIT: SMALL • 6BASE 54/45/18/123

AVAILABLE TECHNOLOGIES

- Polycarbonate Lenses
- Oleo/Hydrophobic Treatment
- HD Polarized Lenses
- Anti-Reflective Treatment

Made in Italy with the highest attention to detail, Rooke's round eye shape and angular nose bridge is a fresh design with hints to classic European styling. Its stainless steel temple plates and handmade finishes are of the same high quality as its optics.
