bollé

| PERFORMANCE INNOVATION SINCE 1888 |

Born in 1888 in France, Bollé is  
the market leading solution for  
eyewear and helmets.

Globally respected and worldwide  
distributed, **Bollé is known as the  
most advanced design and creative  
sport brand**, which creates trends  
and pushes industry boundaries.

bollé®

# Brand History

1888

## A family business

Seraphin Bollé created the brand Bollé; known at this time as one of the first company to use newly developed celluloid, which becomes the basis for Bollé products during those early decades.

1950

## Safety Glasses and Goggles

Safety glasses and goggles were added to the Bollé Line and strengthened our position of pioneer and most performing brand in the industry.

1960

## Ski Goggles

Ski goggles were first marketed by Bollé.

2007

## Ski Helmets

Launch of the first line of ski helmets. A front-line player in the winter sports landscape.

2018

Launch of the best sport lens ever.

2021

A revolutionary HC and polarized lens

1936

## Sunglasses

The brand launches its first sunglasses and becomes quickly the pioneer of molded Nylon.

1956

## Cat-eyes

Georges Bollé created the famous nylon 'cat-eyes' sunglass.

1986

## Chronoshield

Launch of the iconic cycling model.

2015

## Cycling Helmets

Launch of the cycling helmets line.

2020

RYFT

The most ventilated snow helmet in the market.

CHRONOSHIELD 2.0

EXCELLENCE IN PRODUCT INNOVATION & CREATIVITY

EPIC is Bollé's new design and innovation program which allows our Research and Development teams to develop the best and most innovative, performance driven products available in the marketplace.

# Lens segmentation

## 3 LEVELS OF PERFORMANCE

### PHOTOCHROMIC

REVEAL THE INVISIBLE WITH THE BEST LENS IN THE MARKET

Searching for a competitive advantage, superior protection, or an extraordinary visual experience? We thought so. That's why we created Phantom, Bollé's first photochromic lens with phenomenal optical clarity.

### HIGH CONTRAST

EXPERIENCE THE POWER OF COLOR WITH AN EXCEPTIONAL HIGH CONTRAST FILTER

To see colors like never before, you need to test colors like never before. Which is why Bollé used artificial intelligence to evaluate over 20 million color enhancement possibilities. In the end, only one formula provided an incomparable color experience and it's so unique, it is patented. It's called Volt and it now establishes a whole new standard for high contrast lenses.

## POLYCARBONATE

### CLASSIC

EXCELLENT VISIBILITY WITH 100% UV PROTECTION

A standard polycarbonate lens, for excellent visibility and protection.

OPTION  
POLARIZATION

Block light reflections for even more eye comfort

## The best keeps getting better...

### PHOTOCHROMIC PERFORMANCE

Phantom lens technology achieves a wide range of visible light transmission, ensuring precise visual acuity in all weather conditions, including the most extreme. Our lens tint reaches **70% of its full activation within 20 seconds**.

### PLATINUM

A true reference in the world of eye protection, Bollé Safety offers protective glasses trusted by professional workers in demanding industries like automotive, construction, mining, or pharmaceutical. Platinum represents the highest level of expertise in anti fog and anti scratch protection.

With **Phantom and Phantom+**, Bollé brings this expertise to everyone combining a higher performing anti-fog with an anti-scratch that is 40% more durable than the standard.

### HIGH IMPACT RESISTANCE

NXT<sup>™</sup> lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT<sup>™</sup> is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

### OPTICAL CLARITY

Made with NXT<sup>™</sup> material, Phantom lenses raise the optical clarity of our lenses to a new level. NXT<sup>™</sup> material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

### STABILITY

Bollé has advanced the performance of photochromic technology to an entirely new level. The Phantom lens with exclusive LTS Technology (Low Temperature Sensitivity), delivers improved activation, **darkening or lightening whether the temperature is -25°C or 5°C**.

## ... and better with PHANTOM+

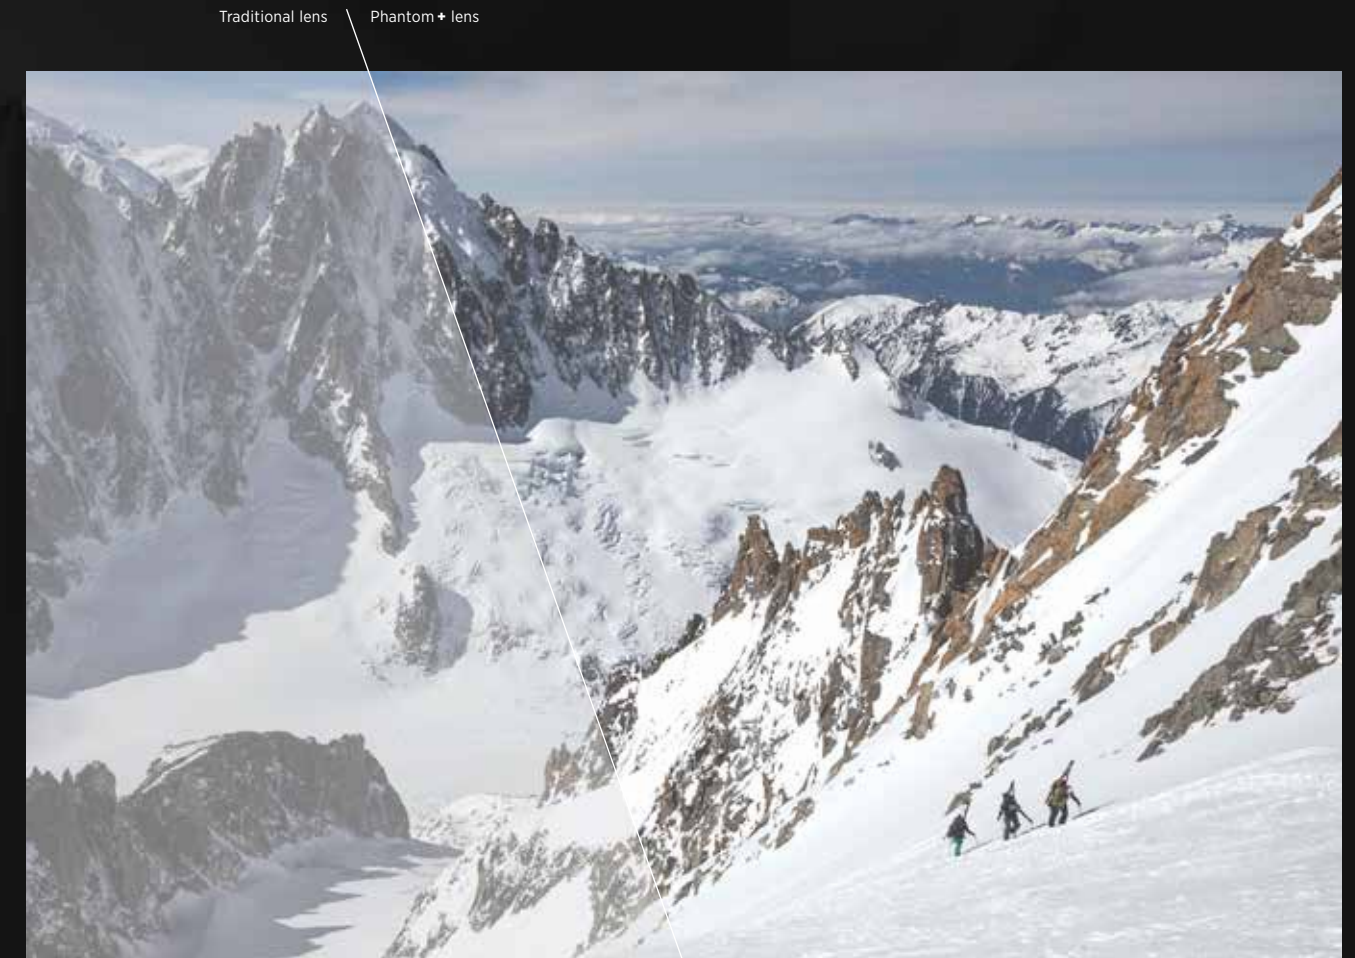

LIGHT ADAPTIVE × PLATINUM

### POLARIZATION

Polarized lenses are largely recognized today for their benefits in terms of blocking reflected glare. So it felt right to add them to our already unbeatable lens technology to improve its performance by yet another step. Equipped with Phantom+ lenses, you will be ready to take on any adventure.

### VISION ENHANCEMENT

The Bollé 50% polarized film works like a moderately dense net that reduces distracting glare while getting enough light transmission through the lens in order to distinguish ice from snow. Phantom+ equipped with this technology offers an optimized reading of the terrain while reducing eye fatigue.

HIGH CONTRAST ENHANCED COLOUR

# Revolutionary Color Enhancement

THE FIRST LENS EVER DEVELOPED WITH ARTIFICIAL INTELLIGENCE

1. Find out which wavelengths to enhance or dampen
2. Design and develop the chemical compounds (pigments) that will absorb the right wavelengths
3. Put together the perfect blend of pigments for the transmission curve we want to achieve

CLEAR

Protect your eyes during night or foggy conditions.

YELLOW

Ideal for low light conditions, yellow lenses enhance depth perception for improved visibility.

PINK

Excellent for a variety of conditions, pink lenses maximize color definition and depth perception.

AMBER

Great for bright light conditions, amber lenses manage yellow light for optimal comfort.

BROWN

Ideal for sunny conditions, brown lenses amplify color contrast and deliver superior visual definition.

GREY

Grey lenses maintain natural color perception, ideal for bright light conditions.

LENS  
TINTS  
BY **bolle**

Bollé lens technology uses 6 different lens base tints to cover the widest range of light conditions, ensuring optimal visual clarity at all times.

# Frame Segmentation

DESIGNED FOR EVERYDAY'S COMPETITORS

## ULTIMATE RANGE

**Iconic** product for competitors wanting the absolute best.

## EVOLUTION RANGE

**Performance** product for men and women who are committed to their sport.

## CLASSIC RANGE

**High quality** product for people who appreciate the values of sport and look for sporty design.

# Frame technologies

Wearing Bollé's ultimate lenses is key to enhancing your vision of the world, yet it is not enough. At Bollé we give extra attention to details and technology while creating our frames, in order to ensure you get the most comfortable and reliable eyewear for your ride.

## DUAL STRAP ADJUSTERS

The two separate adjusters will let you easily set up your goggles perfectly the way you want.

## SILICONIZED STRAP

That sweet addition is there to make sure that once on your head, your goggle will never slip out of position.

## TRIPLE DENSITY FOAM WITH FLEECE

Our most high-end goggles are equipped with a triple foam construction for outstanding comfort over extended periods of time.

## LENS VENTS

An opening in the lens, with foam inserts to block debris, that allows for better air circulation and prevents fogging.

## THERMOFORMED NOSEFOAM

This area is specifically designed to perfectly fit your nose. It is so comfortable you'll forget you are even wearing a goggle.

## AVAILABLE WITH PC, VOLT AND PHANTOM

Volt is our ultimate High Contrast lens with 30% color enhancement (closest competitor is at 15%). Phantom is the best photochromic lens out there, with an outstanding optical clarity.

## INJECTED DOUBLE LENS

This construction creates a thermal barrier between your eyes and the outside, that, combined with the lens vents, will make sure fogging is a thing from the past.

# Goggle features

Find below all of the other advanced technologies featured on our products.

### P-80+ ANTI-FOG

Embedded premium Anti-fog layer in the inner lens disperses water molecules across the surface of the lens, restricting moisture build up that can impede your crystal clear view of the terrain ahead. Available on all our goggles.

### CARBO GLAS® ANTI-SCRATCH

A high-tech protective armor applied to the outer lens creates a shield to significantly reduce scratching, keeping your lenses and outlook as clear as a bluebird sky.

### DOUBLE LENS

Creation of a dual-pane thermal barrier between the cold dry outside air and the moisture generated by intense activity prevents distracting condensation from forming.

### UV PROTECTION

All Bollé Lenses block 100% of harmful UVA/UVB

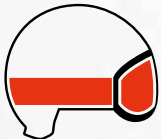

### FLOW-TECH® VENTING

Engineered venting systems in each frame promote directional airflow across the inside surface of the lens, reducing the potential for moisture build up and maintaining your pristine vision.

### FORESTAY™ SYSTEM

Outtrigger systems are designed for goggles to sit snugly on your face, while allowing the strap to interact independently with the latest helmet designs for an integrated fit.

### GOGGLE / HELMET INTEGRATION

Bollé® helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

### SILICONIZED STRAP

The Siliconized strap helps provide total support for the goggle on the helmet.

# RYFT

THE AIR PHENOMENON

THE **MOST VENTILATED** SNOW HELMET  
EVER DESIGNED BY BOLLÉ

SO INSPIRING, IT IS NOW **AN ENTIRE PRODUCT FAMILY**

RYFT MIPS

RYFT EVO MIPS

RYFT PURE

V-RYFT MIPS

V-RYFT PURE

# A new revolutionary ventilation system...

## ACTIVE PANEL VENTILATION

Most snow helmets offer limited ventilation due to the difficulties encountered during the certification tests. The Ryft, on the other hand, has been designed to allow a huge air intake from vertical space around the vent opening, while the panels obstruct anything from penetrating into the headform. This revolutionary system makes it the only certified snow helmet with such a large amount of air channeling.

### AIR CIRCULATION SIMULATION

RYFT

Hybrid Competitor

## FLOW TECH BRIM VENTING REAR VENTS

Flow Tech Venting in the brim connects the goggles to the internal channel on the headform side which connects to the ventilation on the exterior of the EPS but under the shell. The RYFT is composed of multiple paths all interconnected for increasing airflow.

As the RYFT provides such a significant air intake, it needs efficient air extraction. The rear shark vents allow for a huge space underneath the vent panel and effectively flush air and heat out from the helmet.

# ...coming with high-tech features

## HYBRID SHELL: THE BEST OF TWO TECH

Bollé® hybrid shell construction synergizes the key features and benefits of In-mold and ABS shell technologies.

## DELUXE PERFORMANCE LINING

This lining is composed of high-end lycra that wicks away the transpiration while making sure high friction areas are padded so you stay dry and comfortable from dawn to dusk.

## MIPS® BRAIN PROTECTION SYSTEM

For ultimate protection performance, RYFT is equipped with the best brain protection of the market : MIPS® patented Brain Protection System

## NEW GOGGLE RETAINER SYSTEM

Discover this new feature available on the RYFT. Lock and unlock the removable goggle clip easily even when you are wearing gloves. Then enjoy your ride without thinking about adjusting your goggles's strap, due to the integrated grooves on the back and the sides of your RYFT.

## AVID PROGRESSIVE EPS

To make sure our helmets are as ventilated as they can be, our Research and Development team analyzed in details where EPS could be removed without diminishing the level of protection. This way, they were able to dig out channels that enhance the passive ventilation in a very efficient way. Combined with our innovative adjustable ventilation systems, this is how you get the most ventilated helmets on the market.

## FIDLOCK®

## FIDLOCK MAGNETIC BUCKLE

With the integration of the magnet in the buckle, locking your helmet on your head has never been that easy, gloves on or off.

## BOA®

## BOA® FIT SYSTEM

Engineered to push performance further, it is a fit system providing micro-adjustability for fully customized comfort and unmatched stability.

# MIPS TECHNOLOGY

MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

## MIPS ADDS MORE PROTECTION AGAINST ROTATIONAL MOTION

MIPS is a revolutionary technology that lets the helmet slide relative to the head, adding more protection against rotational motion to the brain caused by angled impacts. Because keeping you safe in every condition is our priority.

■ = THE MORE RED THE MORE STRAIN

This simulation illustrates strain in the brain from a similar angled impact when the user is wearing a helmet without MIPS and a helmet with MIPS.

MIPS on visor helmets

MIPS on snow helmets

MIPS on cycling helmets

# AVID PROGRESSIVE EPS

INCREASED VENTILATION • ADVANCED PROTECTION

## VENTILATION

Every part of a helmet doesn't need the same quantity of EPS to provide perfect protection. Our Research and Development team carefully analyzed which areas could be carved out to reduce the unnecessary amount of EPS without reducing the level of security. This process allowed for bigger inner-space for the air to circulate and increase the passive ventilation proprieties as well as the weight of the helmets equipped with our AVID technology.

## PROTECTION

By reducing the amount of EPS in the areas where it was possible, we virtually reduced the EPS density of those areas. That way they provide perfect protection for medium and low energy impacts by compressing upon contact while the surrounding areas with high density EPS keep your head safe from high energy impacts by absorbing the shock.

## A SPECIFIC CASE: THE INSTINCT 2.0 MIPS

In addition to the reduction of the amount of EPS itself, the In-Mold construction of the INSTINCT 2.0 MIPS allowed us to truely integrate 2 different types of EPS with 2 different densities. A low density foam on the top of the head where impacts carry less energy and a high density foam on the sides and the back of the head where impacts carry the most destructive energy. This process provided a lighter overall product, while enhnancing the ventilation and protection proprieties of the AVID technology.

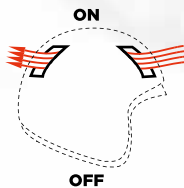

Helmet features

BOA®

Engineered to push performance further, the Boa® Fit System provides micro-adjustability for fully customized comfort and unmatched stability. Dial in your perfect fit, stay in the moment and ride with comfort with Boa®.

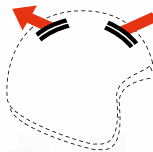

AIR EXTRACTOR

Venting holes provide constant air circulation. Cool air comes in from the front and extracts hot air at the back in order to keep your head just at the right temperature in any condition.

ADJUSTABLE VENTILATION

The adjustable ventilation system is easy to use and enables you to control the amount of air coming in for maximized comfort.

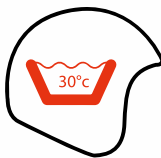

INTEGRATED VENTILATION

Openings at strategic points on the helmet ensure constant airflow inside.

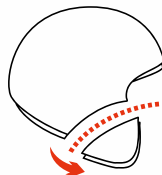

CLICK-TO-FIT™ SYSTEM

Our Click-To-Fit™ system allows you to fine tune the fit of your helmet easily and quickly. Our rubberized adjustment wheel lets you tighten or loosen the helmet effortlessly, even with your gloves on!

DETACHABLE LINING

Most Bollé® helmets feature detachable and washable inner lining.

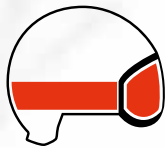

REMOVABLE EARPADS

Designed to be comfortable and warm, while still allowing you to hear clearly. Helmet ear pads can be removed for washing.

AUDIO KIT

Our audio kit system offers great stereo sound with a volume dial for quick and simple sound control. Super thin speakers are inserted directly into Bollé® earpads so you can't lose them.  
\*Audio kit sold separately

PERFECT GOGGLE / HELMET INTEGRATION

Bollé® helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

Alexis Pinturault

CAT.3

At Bollé, we know racing and what it takes to be a champion. Just ask Alexis Pinturault, or better, just ask his rivals. Following Pinturault's Medalist Carbon Pro, we introduce the junior version with the Medalist Junior, our top performance model for young athletes. FIS certified and equipped with MIPS, the Medalist Junior has a compact shape for enhanced aerodynamism. And because when you find your helmet, you don't want to change it, the Medalist Junior offers a click to fit system that allows the helmet to grow with the young competitors.

There is a reason some people think it was created by the luxury designers at Ferrari. The Ryft and its state-of-the-art design does what no helmet has done before. A unique and patented active panel ventilation system provides an unprecedented airflow, making the Ryft the most ventilated helmet ever designed by Bolle. Equipped with MIPS, this hybrid helmet also meets the highest impact protection norms for a safe ride in any condition. So inspiring, it is now an entire product family, with 4 additional models.

The very first Junior visor helmet from Bollé: we took all of the great technologies of QUIZ and then added a visor to create the exciting QUIZ VISOR. The durable and tough ABS hard shell sits on top of an EPS liner to provide good protection against impacts and sharp objects. The Air Extractor vents keep the head cool and the Click-To-Fit™ system provides great comfort, adjusting the size as kids grow.

# PRIZE

FIT: MEDIUM • 6BASE 51/45/140/135

NEW

The PRIZE is an eyecatching but well-balanced cat-eye in the Slim family of sleek and lightweight sport lifestyle product. The cut angles gives great character and distinction while sport features like the Thermogrip® rubber and the straight temples enhance its performance potential.

# GLORY

FIT: LARGE • 6BASE 51/45/140/140

NEW

A hint to our 80' heritage: The GLORY's large cat eye design with performance features is the perfect mix of sport and lifestyle. It is lightweight and sleek, with straight dynamic temples and Thermogrip® rubber to keep it in place during action.

# SCORE

FIT: MEDIUM • 6BASE 53/42/140/135

NEW

The SCORE takes the game with its lightweight and flexible TR90 nylon frame and its super-wearable dimensions. The rectangular eyeshape with thermo grip rubber on nose pad and temple tips works great both for sport and casual wear.
