EXCELLENCE IN PRODUCT INNOVATION & CREATIVITY

EPIC is Bollé's design and innovation program which allows our Research and Development teams to develop the best and most innovative, performance driven products available in the marketplace.

LENS SEGMENTATION

3 LEVELS OF PERFORMANCE

PHOTOCHROMIC

REVEAL THE INVISIBLE WITH THE BEST LENS IN THE MARKET

Searching for a competitive advantage, superior protection, or an extraordinary visual experience? We thought so. That's why we created Phantom, Bollé's first photochromic lens with phenomenal optical clarity.

HIGH CONTRAST

EXPERIENCE THE POWER OF COLOR WITH AN EXCEPTIONAL HIGH CONTRAST FILTER

To see colors like never before, you need to test colors like never before. Which is why Bollé used artificial intelligence to evaluate over 20 million color enhancement possibilities. In the end, only one formula provided an incomparable color experience and it's so unique, it is patented. It's called Volt and it now establishes a whole new standard for high contrast lenses.

STANDARD LIGHT FILTER

ESSENTIAL

EXCELLENT VISIBILITY WITH 100% UV PROTECTION

The Standard Light Filter lens (SLF) is a polycarbonate lens with an anti-scratch and anti-fog coating which offers excellent visibility and protection.

POLARIZATION OPTION

Block light reflections for even more eye comfort

STANDARD LIGHT FILTER

HIGHEST PERFORMANCE LENS ON THE MARKET

PHOTOCHROMIC / OPTICAL CLARITY / PLATINUM ANTI-FOG

POLARIZED OPTION WITH PHANTOM+ LIGHT ADAPTIVE LENS TECHNOLOGY

THE BEST KEEPS GETTING BETTER...

PHOTOCHROMIC PERFORMANCE

Phantom lens technology achieves a wide range of visible light transmission, ensuring precise visual acuity in all weather conditions, including the most extreme. Our lens tint reaches **70% of its full activation within 20 seconds.**

PROTECTIVE COATING

A true reference in the world of eye protection, Bollé Safety offers protective glasses trusted by professional workers in demanding industries like automotive, construction, mining, or pharmaceutical.

◆ **PLATINUM** represents the highest level of expertise in anti-fog and anti-scratch protection.

With **Phantom and Phantom+**, Bollé brings this expertise to everyone combining a higher performing anti-fog with an anti-scratch that is 40% more durable than the standard.

HIGH IMPACT RESISTANCE

NXT[™] lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT[™] is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

OPTICAL CLARITY

Made with NXT[™] material, Phantom lenses raise the optical clarity of our lenses to a new level. NXT[™] material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

STABILITY

Bollé has advanced the performance of photochromic technology to an entirely new level. The Phantom lens with exclusive LTS Technology (Low Temperature Sensitivity), delivers improved activation, **darkening or lightening whether the temperature is -25°C or 5°C.**

... AND BETTER WITH PHANTOM+

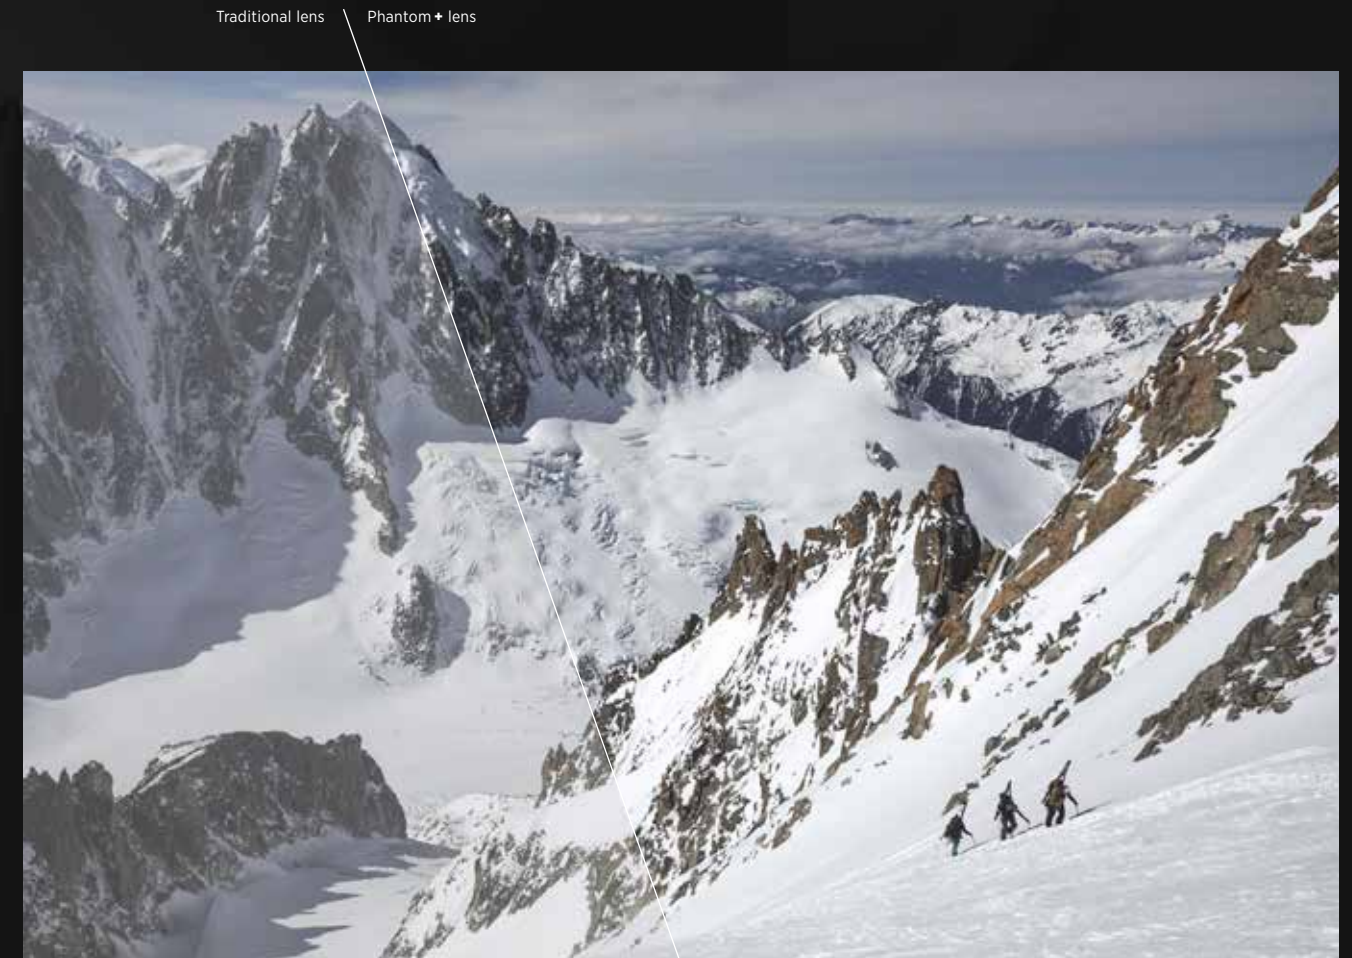

LIGHT ADAPTIVE LENS TECHNOLOGY

POLARIZATION

Polarized lenses are largely recognized today for their benefits in terms of blocking reflected glare. So it felt right to add them to our already unbeatable lens technology to improve its performance by yet another step. Equipped with Phantom+ lenses, you will be ready to take on any adventure.

VISION ENHANCEMENT

The Bollé 50% polarized film works like a moderately dense net that reduces distracting glare while getting enough light transmission through the lens in order to distinguish ice from snow. Phantom+ equipped with this technology offers an optimized reading of the terrain while reducing eye fatigue.

**EXPERIENCE

TECHNOLOGY FROM
COLOR DEFICIENCY LENS

CLEAR

Protect your eyes during night or foggy conditions.

YELLOW

Ideal for low light conditions, yellow lenses enhance depth perception for improved visibility.

PINK

Excellent for a variety of conditions, pink lenses maximize color definition and depth perception.

AMBER

Great for bright light conditions, amber lenses manage yellow light for optimal comfort.

BROWN

Ideal for sunny conditions, brown lenses amplify color contrast and deliver superior visual definition.

GREY

Grey lenses maintain natural color perception, ideal for bright light conditions.

Bollé lens technology uses 6 different lens base tints to cover the widest range of light conditions, ensuring optimal visual clarity at all times.

RX LENS TECHNOLOGY

EXPERIENCE THE ULTIMATE IN PRESCRIPTION

PRECISION OPTICS

- Phantom Technology: optical photochromic lenses
- Hydrophobic/Oleophobic treatment
- Adjustable nosepiece and temples
- Wide range of shield colors
- Volt+ lens also available soon.

B-THIN ACTIVE DESIGN

Our prescription technology is now integrated on our spherical shields frames (e.g. Lightshifter, Chronoshield, Lightshifter XL, ...). Most shield lens colors will be available in the coming months.

AVAILABLE IN 99% OF PRESCRIPTION

(+6.00 to -8.00, cylinder to -4.00) combined power

XXL FIELD OF VIEW

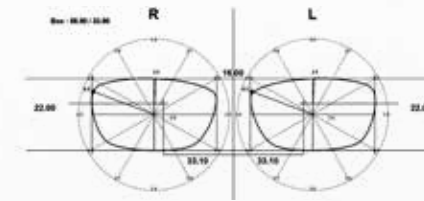

Laser cut inserts (no optical clip) for optimal lightness

PRESCRIPTION PROGRAMME

A FAST & INTUITIVE WEBSHOP

WHAT IS B-THIN ACTIVE DESIGN TECHNOLOGY ABOUT?

Software using the most advanced calculations is used to create customized lenses and the ultimate in lightweight products. Every prescription is reassessed to compensate for optical distortions related to the frame wrap angle. When the prescription reaches the limits of the conventional digital surfacing method, our patented algorithm calculates the best lens geometry regarding the optical area, the transition zone and reduces the edge thickness (US patent number 8,002,404). Every product is customized to the prescription, frame and wearer's facial metrics, ensuring optimum precision, comfort and frame balance for sports sunglasses.

1 VISIT OUR WEBSHOP

<https://www.bolle.com/gb/prescription-program.html>

2 JUST A FEW CLICKS

IS ALL IT TAKES

3 PLACE YOUR ORDER

ONLINE

NEW WEBSHOP COMING

During Spring 2022, a new version of the RX Webshop (link to be found on : <https://www.bolle.com/gb/prescription-program.html>) will be available to the opticians, to make the RX ordering process even easier.

New webshop, more informative, easier to use : you can enter the prescription details of the frame wearer and the webshop will automatically filter for you the available frame & lens combinations corresponding to his/her prescription.

A lens thickness calculator also helps you to anticipate the best solution for each wearer.

FRAME SEGMENTATION

DESIGNED FOR EVERYDAY'S COMPETITORS

ULTIMATE RANGE

Iconic product for competitors wanting the absolute best.

EVOLUTION RANGE

Performance product for men and women who are committed to their sport.

ESSENTIAL RANGE

High quality product for people who appreciate the values of sport and look for sporty design.

FRAME TECHNOLOGY

Wearing Bollé's ultimate lenses is key to enhancing your vision of the world, yet it is not enough. At Bollé we give extra attention to details and technology while creating our frames, in order to ensure you get the most comfortable and reliable eyewear for your ride.

DUAL STRAP ADJUSTERS

The two separate adjusters will let you easily set up your goggles perfectly the way you want.

SILICONIZED STRAP

That sweet addition is there to make sure that once on your head, your goggles will never slip out of position.

TRIPLE DENSITY FOAM WITH FLEECE

Our most high-end goggles are equipped with a triple foam construction for outstanding comfort over extended periods of time.

LENS VENTS

An opening in the lens, with foam inserts to block debris, that allows for better air circulation and prevents fogging.

THERMOFORMED NOSEFOAM

This area is specifically designed to perfectly fit your nose. It is so comfortable you'll forget you are even wearing a goggles.

AVAILABLE WITH STANDARD LIGHT FILTER, VOLT AND PHANTOM

Volt is our ultimate high contrast lens with 30% color enhancement (closest competitor is at 15%). Phantom is the best photochromic lens out there, with an outstanding optical clarity.

INJECTED DOUBLE LENS

This construction creates a thermal barrier between your eyes and the outside, that, combined with the lens vents, will make sure fogging is a thing from the past.

LOCKED IN LOCKED IN

NEVADA NEO

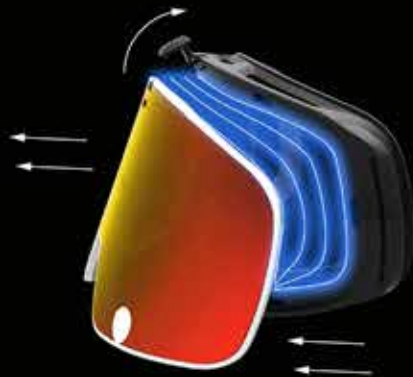

TORUS NEO

LOCKED WHATEVER THE ACTION

Thanks to the EyeLatch, secure your lens in a blink of an eye. Open it to change the lens, and close it to lock it for the whole session, whatever the action.

FORGET ABOUT THE WEATHER

With its kit of 2 magnetic lenses, both NEVADA NEO and TORUS NEO offer the best vision whatever the conditions. Change the lens quickly to adapt to weather shifts.

GOGGLES FEATURES

Find below all of the other advanced technologies featured on our products.

P-80+ ANTI-FOG

Embedded premium Anti-fog layer in the inner lens disperses water molecules across the surface of the lens, restricting moisture build up that can impede your crystal clear view of the terrain ahead. Available on all our goggles.

CARBO GLAS® ANTI-SCRATCH

A high-tech protective armor applied to the outer lens creates a shield to significantly reduce scratching, keeping your lenses and outlook as clear as a bluebird sky.

DOUBLE LENS

Creation of a dual-pane thermal barrier between the cold dry outside air and the moisture generated by intense activity prevents distracting condensation from forming.

UV PROTECTION

All Bollé lenses block 100% of harmful UVA/UVB

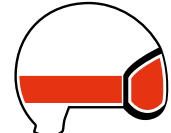

FLOW-TECH® VENTING

Engineered venting systems in each frame promote directional airflow across the inside surface of the lens, reducing the potential for moisture build up and maintaining your pristine vision.

FORESTAY™ SYSTEM

Outrigger systems are designed for goggles to sit snugly on your face, while allowing the strap to interact independently with the latest helmet designs for an integrated fit.

GOGGLES / HELMET INTEGRATION

Bollé helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

SILICONIZED STRAP

The Siliconized strap helps provide total support for the goggles on the helmet.

- Flow Tech® Venting
- Double density foam
- Silicon on strap
- Vented lens

Searching for OTG goggles but not ready to give up on style? The Y7 OTG is the newborn from Bolle's over the glasses range. Its injected double lens provides a better optic and its increased ventilation at the bottom and top of the frame give extra airflow to prevent fog. Available with Phantom and Volt.

HELMET TECHNOLOGY | WINTER 2022-23

HELMET: Ryft Mips
GOGGLES: Nevada Neo

RYFT

A REVOLUTIONARY VENTILATION SYSTEM

Active Panel Vent **CLOSED**

Active Panel Vent **OPEN**

ACTIVE PANEL VENTILATION

Most snow helmets offer limited ventilation due to the difficulties encountered during the certification tests. The Ryft, on the other hand, has been designed to allow a huge air intake from vertical space around the vent opening, while the panels obstruct anything from penetrating into the headform. This revolutionary system makes it the only certified snow helmet with such a large amount of air channeling.

AIR CIRCULATION SIMULATION

RYFT

Hybrid Competitor

FLOW TECH BRIM VENTING REAR VENTS

Flow Tech Venting in the brim connects the goggles to the internal channel on the headform side which connects to the ventilation on the exterior of the EPS but under the shell. The RYFT is composed of multiple paths all interconnected for increasing airflow.

As the RYFT provides such a significant air intake, it needs efficient air extraction. The rear shark vents allow for a huge space underneath the vent panel and effectively flush air and heat out from the helmet.

...COMING WITH HIGH-TECH FEATURES

HYBRID SHELL: THE BEST OF TWO TECH

Bollé Hybrid shell construction synergizes the key features and benefits of In-mold and ABS shell technologies.

DELUXE PERFORMANCE LINING

This lining is composed of high-end lycra that wicks away the transpiration while making sure high friction areas are padded so you stay dry and comfortable from dawn to dusk.

BRAIN PROTECTION SYSTEM

For ultimate protection performance, RYFT is equipped with the best brain protection of the market : MIPS® patented Brain Protection System

NEW GOGGLES RETAINER SYSTEM

Discover this new feature available on the RYFT. Lock and unlock the removable goggles clip easily even when you are wearing gloves. Then enjoy your ride without thinking about adjusting your goggles' strap, due to the integrated grooves on the back and the sides of your RYFT.

AVID PROGRESSIVE EPS

To make sure our helmets are as ventilated as they can be, our Research and Development team analyzed in details where EPS could be removed without diminishing the level of protection. This way, they were able to dig out channels that enhance the passive ventilation in a very efficient way. Combined with our innovative Adjustable ventilation systems, this is how you get the most ventilated helmets on the market.

FIDLOCK® MAGNETIC BUCKLE

With the integration of the magnet in the buckle, locking your helmet on your head has never been that easy, gloves on or off.

BOA® FIT SYSTEM

Engineered to push performance further, it is a fit system providing micro-adjustability for fully customized comfort and unmatched stability.

MIPS TECHNOLOGY

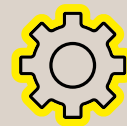

MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

PATENTED SAFETY SYSTEM

LOW FRICTION LAYER

FOUNDED IN SCIENCE

THE LOW FRICTION LAYER ALLOWS A MULTI-DIRECTIONAL MOVEMENT OF 10-15 MM ON CERTAIN ANGLED IMPACTS, INTENDED TO REDUCE ROTATIONAL FORCE TO THE HEAD.

LEARN MORE: [MIPSPROTECTION.COM](https://mipsprotection.com)

AVID PROGRESSIVE EPS

INCREASED VENTILATION • ADVANCED PROTECTION

VENTILATION

Every part of a helmet doesn't need the same quantity of EPS to provide perfect protection. Our Research and Development team carefully analyzed which areas could be carved out to reduce the unnecessary amount of EPS without reducing the level of security.

This process allowed for bigger inner-space for the air to circulate and increase the passive ventilation properties as well as the weight of the helmets equipped with our AVID technology.

PROTECTION

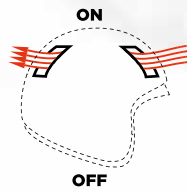

By reducing the amount of EPS in the areas where it was possible, we virtually reduced the EPS density of those areas. That way they provide perfect protection for medium and low energy impacts by compressing upon contact while the surrounding areas with high density EPS keep your head safe from high energy impacts by absorbing the shock.

HELMET FEATURES

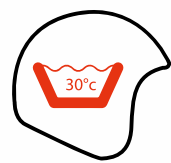

BOA®

Engineered to push performance further, the Boa® Fit System provides micro-adjustability for fully customized comfort and unmatched stability. Dial in your perfect fit, stay in the moment and ride with comfort with Boa®.

AIR EXTRACTOR

Venting holes provide constant air circulation. Cool air comes in from the front and extracts hot air at the back in order to keep your head just at the right temperature in any condition.

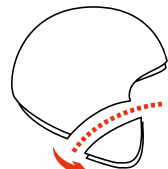

DETACHABLE LINING

Most Bollé helmets feature detachable and washable inner lining.

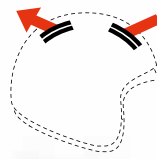

ADJUSTABLE VENTILATION

The Adjustable ventilation system is easy to use and enables you to control the amount of air coming in for maximized comfort.

REMOVABLE EARPADS

Designed to be comfortable and warm, while still allowing you to hear clearly. Helmet ear pads can be removed for washing.

PASSIVE VENTILATION

Openings at strategic points on the helmet ensure constant airflow inside.

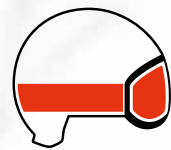

AUDIO KIT

Our audio kit system offers great stereo sound with a volume dial for quick and simple sound control. Super thin speakers are inserted directly into Bollé earpads so you can't lose them.
*Audio kit sold separately

CLICK-TO-FIT™ SYSTEM

Our Click-To-Fit™ system allows you to fine tune the fit of your helmet easily and quickly. Our rubberized adjustment wheel lets you tighten or loosen the helmet effortlessly, even with your gloves on!

PERFECT GOGGLES / HELMET INTEGRATION

Bollé helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

There is a reason some people think it was created by the luxury designers at Ferrari. The RYFT and its state-of-the-art design does what no helmet has done before. A unique and patented active panel ventilation system provides an unprecedented airflow, making the RYFT the most ventilated helmet ever designed by Bollé. Equipped with MIPS, this hybrid helmet also meets the highest impact protection norms for a safe ride in any condition. So inspiring, it is now an entire product family, with 4 additional models.

You probably heard about the Ryft, the helmet that pushes the limit of the industry. Did you know there was an entire range inspired by the Ryft? The Ryft Evo offers a perfect alternative to its famous big brother. Equipped with MIPS for brain safety and BOA for a top fit system, this hybrid helmet features an active ventilation with 14 vents and 3D earpads for optimum comfort and hearing. In a nutshell, a high end, all mountain, performance helmet tuned to meet the needs of demanding skiers on or off piste.

FOR JUNIORS

QUIZ VISOR

SIZES: FROM 52 TO 62 CM

AVAILABLE TECHNOLOGIES

- Active Panel Ventilation
- Air Flow Extractor
- Hybrid shell
- Removable and washable lining
- Double Density Face Foam
- Weight: 660g
- Supplied with carry bag

The very first Junior visor helmet from Bollé: we took all of the great technologies of QUIZ and then added a visor to create the exciting QUIZ VISOR. The durable and tough ABS hard shell sits on top of an EPS liner to provide good protection against impacts and sharp objects. The Air Extractor vents keep the head cool and the Click-To-Fit™ system provides great comfort, adjusting the size as kids grow.

FIT: LARGE • 4 BASE 60/46/140/140

AVAILABLE TECHNOLOGIES

Available with Volt+ lens
Available with polarized SLF lens
Thermogrip®
TR90 Nylon Frame
Snap Hinge
S-Fit temples

A large, angular aviator with low base curve. Don't let the looks fool you, the frame technologies leaves nothing to wish for. The Thermogrip® rubber keeps it in place during action and the lightweight design in high grade TR90 nylon makes it comfortable and flexible.
