BIKE 2024
MAIN

MADE TO PEDAL

BORN TO RIDE FREE

Dainese has completely eliminated the concept of segmentation by discipline. MTB protectors, helmets and apparel are created not just for enduro, trail or all-mountain biking, but to guarantee maximum freedom of movement even during longer rides, in total safety.

This approach is based on greater lightness, breathability and comfort when pedaling. Garments, helmets and protectors are designed for long rides, ensuring maximum freedom of movement on the saddle, from the steepest slopes to the most technical, uneven descents.

The most effective protector is freedom.

FOOTWEAR

EXTRA PROTECTION AND STABILITY

Reinforced heel made of TPU

EASY TO ADJUST WRAP-AROUND SYSTEM

Speed lace closure combined with elastic tapes to wrap the foot

COMFORT IN ALL CONDITIONS

Breathable but protective upper for any tough condition

FREEDOM OF MOVEMENT

Protective and ergonomic upper made of eva in Auxagon pattern

STRENGTHENED TOE CUP

Rubber cover to protect from impact

MATERIA

Maximum protection combined with sensitivity and comfort on pedals.

HELMETS

LINEA 01 EVO

The highest standards of protection, in the lightest full-face helmet ever.

PROTECTION

Thanks to its polycarbonate and dual-density EPS shell and the auxetics nylon exoskeleton it exceed all international standards in the category: CPSC 1203, CE EN1078, ASTM F1952-DH, ASTM 2032-BMX, AS/NZ 2063

LIGHTNESS

Just 570 grams (size M). Simply the lightest full face mountain bike helmet ever. Imperceptible to wear, designed to provide the highest level of protection while leaving total freedom of movement.

BREATHABILITY

Built to breathe. 29 air vents on the helmet: 8 on the chin guard, 5 in the frontal area, 2 close to the ears, 4 longitudinal and 10 rear extractors. Total ventilation for endless activity on the bike.

WIDE AND RESISTANT PEAK

Light, functional and GoPro Ready

THE GREATEST PROTECTION ON ANY ROUTE

Polycarbonate and dual-density EPS shell, mapped to provide greater protection where you need it most

IMPERCEPTIBLE TO WEAR, FOR LIMITLESS RIDING

Just 570 grams.

No lighter helmet reaches this level of safety.

SCARABEO

SCARABEO
LINEA 01

The helmet engineered around your kids' head

PROTECTION

No compromise in protection. The Scarabeo Helmets meets the highest international standards: CE EN 1078:2002+A1:2012 (UE), CPSC 1203 (US), CPSIA | ASTM F2032-15 (BMX) | AS/NZS 2063 (AUS/NZL).

LIGHTNESS

Designed and engineered around kids' heads: it's not an adult downsizing, it's a helmet that meets the real needs of children aged 5 to 10. The result is a light and perfectly wearable cool helmet.

PERFECTLY FITTED

Starting from the size 50 – 54, the interchangeable jaw pads and neckroll allow adapting the helmet fit.

SCARABEO

The Dainese Scarabeo line offers the youngest riders technology developed by the great MTB champions and used in world championships. All the safety of the professionals, to protect the athletes of tomorrow.

Scarabeo garments come complete with the innovative patented Dainese RIBBO System. By cutting the special ties that control fabric elasticity, the circumference of the gear can be gradually increased as the young rider grows, allowing to use it for several seasons.

Kid's play got serious.

MEASUREMENTS

As it is not currently possible to industrially produce tailored back protectors, back protector must be worn by people with anthropometric characteristics lying within a certain range. A back protector is suitable for a person if its height does not exceed the seventh cervical vertebra and if the minimum area of the model is related to a waste shoulder height greater than or equal to that of the person.

CHOOSE THE SIZE OF A PROTECTOR CORRECTLY

The choice of the correct size of a back protector, according to the standard, is determined by the Waist-Shoulder height. This is the difference in height between the midpoint of the shoulder and the waistline (immediately above the hipbone). According to the Dainese standard, this measurement must then be qualified by the correct dimension of waist strap, identified by a size (ex: XS, S, M...). It is not correct to define the measure of the backprotector on the basis of the height of the person, because even if the back could have the same dimension, the legs could have a different lenght.
