

FALL WINTER 24/25

SOCKS COLLECTION

WE LOVE NATURE

Intersocks is committed to make the environment better and respect nature. We deliver positive products responsibly sourcing, using recycled and natural yarns and consciously designing and developing. Our operations are focused on decarbonization, on reducing water consumption by 50% and on reducing & recycling waste.

RECYCLED POLYESTER

Recycled polyester is made from recycled plastic bottles. It is almost the same as virgin polyester in terms of quality, but its production requires 59% less energy compared to virgin polyester.

RWS WOOL

Responsible Wool Standard certifies farmers meet rigorous animal welfare and land management requirements.

ORGANIC COTTON

Organic cotton is extracted only from natural seeds and in the cultivation of which pesticides or chemicals, that are harmful to the ecosystem, have not been used.

 **Eisbär**

FIBRES

Adding as little as 2 to 3 percent of Lycra® to cotton or wool allows socks to acquire superior staying power and ultimate stretch. This assures superior wear, comfort, excellent size stability and uniform appearance. Socks with Lycra® retain their size and shape after repeated wear and laundering.

Cotton is a soft, natural fibre that absorbs moisture easily and draws heat away from the skin to keep you cool, making sock comfortable to wear. It can absorb up to one fifth of its weight in water before it feels damp. The fabric doesn't irritate skin or cause static electricity.

The highest, finest type of wool obtainable. It does not itch and is shrink treated to hold its size and shape.

Polypropylene fibres have the lowest thermal conductivity of all the other fibres. Its unique vapour transfer ability (wicking) moves perspiration quickly and naturally away from the body to the outside where the moisture then evaporates. It's durable, easily washable and odour-free.

100% polyester. It guarantees an improved comfort doing sport. It facilitates transfer of perspiration and sweat evaporation, keeping a soft and pleasant handle with a fresh feeling. It's easy to care: easy washing, drying and ironing and has "wrinkle free" characteristics.

This synthetic fibre is soft, warm, lightweight, machine washable, fast drying and long wearing. It resists shrinkage, sagging and stretching. It does not itch, it is excellent for cushioned products and has high wicking properties.
